## PEDI2MC - Introduction

## PEDI2MC - Admission

***For the specific conditions of this program : refer to the French version***

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

---

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

## PEDI2MC - Information

### Learning outcomes

---

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Pediatrics (Ministerial Decree of 15.09.1979, published on 26.09.1979, modified by the Ministerial Decree of 03.05.1999, published on 08.07.1999).

### Evaluation

---

An evaluation of the knowledge acquired is carried out at the end of each part of the programme. Besides this, the candidate will write a thesis and have an article published in a specialist review. Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training course. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Pediatrics.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of a specialised training programme leading to this validation.

## PEDI2MC - Detailed programme

### Programme structure

---

The training course comprises full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, including three years of foundation studies and two years of higher training. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

### Programme by subject

---

Parallel to the practical training, the specialist candidate will follow a university training programme organised as follows :

#### **part - Foundation studies**

Three years of training, consisting of :

- Theoretical courses : In-depth questions on internal pediatric medicine, In-depth questions on emergency medicine and intensive pediatric care, Complements of social pediatrics and prevention in schools, Complements of psychopathology in children
- Seminars : Seminar on pediatrics, Seminar on intensive care and neonatology
- A period of supervised hospital training : Polyclinic pediatrics, polyclinic neonatology, Polyclinic intensive care

The theoretical sessions of the first two years form part of the specific university training programme (FUS, in French).

#### **part - Higher studies**

Two years of training, consisting of :

- Theoretical courses : In-depth questions on nutrition and growth, complements of pediatric cardiology and pneumology, complements of pediatric neurology and metabolic diseases, complements of haematology, oncology and immunology.
- Seminars: Seminar on pediatric cardiology, Seminar on pediatric hematology and oncology.
- A period of supervised hospital training: Pediatric cardiology and polyclinic Pneumology, polyclinic pediatrics, polyclinic endocrinology, pediatric hematology and polyclinic oncology, polyclinic pediatric gastro-enterology.
