## Teaching profile

### Learning outcomes

The main objective of the minor is to train students enrolled in a bachelor programme to acquire a basic training in population and development studies, enabling them to understand and, to some extent, analyze the challenges of poverty, demographic transitions, ageing populations, North-South inequalities, and the interactions between population, environment and development.

The minor combines into a single block six courses (of 5 credits each) organized by the Department of population and development studies. . These six courses provide an overview of the population-development issues and train students to acquire knowledge in:

- demographic analysis and development theories
- population and development policies
- issues and challenges of the 21st century, both demographic as well as political, social and economic
- relationships between gender and social, economic and political inequalities
- analyses of the interaction between population, environment and development.

### Admission

Since it does not require any prerequisite subjects or special training, the minor is open to any student enrolled in a bachelor programme at UCL. Since it employs tools and approaches which mainly come from social and human sciences, it provides further training both for students in science and technology or health sciences as well as for those who wish to widen their programme in human sciences.

### Possible trainings at the end of the programme

This minor may be chosen by students studying a particular subject as a means of broadening their horizons and training in an interdisciplinary issue. It may also be used as a preliminary stage towards the 120 credit Master in Population and Development Studies.
