MOTR2M1 - Introduction

Introduction

MOTR2M1 - Teaching profile

Learning outcomes

This Master is designed for students who do not wish to undergo further professional training in physiotherapy and rehabilitation. This training is aimed at students who are interested in issues of normal and pathological motor skills, a field in which they can develop their expertise from a theoretical point of view.

Programme structure

This one year Master is principally designed for students who do not wish to undergo further professional training in physiotherapy and rehabilitation. This training is aimed at students who are interested in issues of normal and pathological motor skills, a field in which they can develop their expertise from a theoretical point of view.

Students do not have the opportunity of specializing through option courses and focuses such as the ones available for the 120 credit Master.

Specializing

You will be able to develop your knowledge in one of the following areas : technological aids for handicapped people, prevention of pathologies linked with working conditions and adapted physical activities used as additional therapy.

The dissertation that you will do at the end of the course will also enable you to specialize in an advanced area of physiotherapy or rehabilitation. The dissertation may be an account of a particular issue, through bibliographic research, or be centred on experimental research in the laboratory. You will benefit from close collaboration and a privileged learning relationship with your supervisor.

o Cours au choix

L'étudiant choisit un cours parmi les 2 cours suivants :

⊗ LKINE2129	Additions in technology and rehabilitation	Guillaume Bastien, Christine Detrembleur, Bénédicte Schepens, Patrick Willems (coord.)	30h	3 Credits	1q
⊗ LKINE2188	Prevention of diseases related to working conditions	Valérie-Anne De Wilde, Etienne Masquelier, Bénédicte Schepens (coord.)	30h	3 Credits	1q

MOTR2M1 - Information

Admission

General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..

- [University Bachelors](#)
- [Non university Bachelors](#)
- [Holders of a 2nd cycle University degree](#)
- [Holders of a non-University 2nd cycle degree](#)
- [Adults taking up their university training](#)
- [Personalized access](#)

University Bachelors

Diploma	Special Requirements	Access	Remarks
UCL Bachelors			
Bachelor in Physiotherapy and Rehabilitation Bachelor in Motor skills : General		Direct access	
Others Bachelors of the French speaking Community of Belgium			
Bacheliers universitaires en kinésithérapie et réadaptation Bacheliers universitaires en sciences de la motricité		Direct access	
Bachelors of the Dutch speaking Community of Belgium			
Bacheliers universitaires en kinésithérapie et réadaptation		Access with additional training	Accès après une année de programme adapté en kinésithérapie et réadaptation
Foreign Bachelors			
Bacheliers universitaires en kinésithérapie et réadaptation		Access with additional training	Accès après une année de programme adapté en kinésithérapie et réadaptation

Non university Bachelors

Diploma	Access	Remarks
> Find out more about links to the university		
> BA - éducateur(trice) spécialisé(e) en activités socio-sportives > BA-AESI en éducation physique > Spécialisation en psychomotricité	Accès au master moyennant réussite d'une année préparatoire de max. 60 crédits	Type court

Holders of a 2nd cycle University degree

> See the website [Valorisation des acquis de l'expérience](#)

It is possible to gain admission to all masters courses via the validation of professional experience procedure.

Les adultes avec une expérience professionnelle pourront s'inscrire au programme sur base d'une procédure d'admission individualisée.

—
Personalized access

Reminder : all Masters (apart from Advanced Masters) are also accessible on file.

—
Admission and Enrolment Procedures for general registration

Teaching method

The Master in Motor Skills: General is centred on acquiring and developing specific skills in physiotherapy in various areas of application (orthopaedic, neurological, respiratory, uro-gynaecological, cardio-vascular, psychiatric, pediatric, geriatric etc). The teaching is done in different ways: lectures, practical courses in small groups and sessions on specialized techniques.

Through the optional subjects, students can develop their knowledge in one of the following areas : technological aids for handicapped people, prevention of pathologies linked with working conditions and adapted physical activities used as additional therapy.

By doing a dissertation, students may specialize in a precise area either through bibliographic research or through experimental work in a laboratory, benefiting from close collaboration and a privileged learning relationship with their supervisor.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

There are three main sessions of examinations : in January, June and September.

Assessment of the theoretical courses is based on a written or oral examination and may be combined and/or replaced by elements of continuous assessment.

Assessment of the practical training is continuous and may be supplemented by a final assessment.

Students will be informed of the methods of assessment at the beginning of each course.

Possible trainings at the end of the programme

Advanced Masters : none

Doctoral programmes : none
