ANES2MC - Introduction

Introduction

ANES2MC - Teaching profile

Learning outcomes

Ce programme de 2e cycle complémentaire a pour objectif de préparer les médecins à l'agrément comme titulaire du titre professionnel particulier de médecin spécialiste en Anesthésie - Réanimation (A.M. du 15.09.1979 publié le 26.09.1979). Au terme de sa formation, le candidat sera capable de délivrer le mode d'anesthésie le plus approprié à tout patient électif ou urgent requérant une intervention médicale ou chirurgicale, il aura acquis une expertise particulière dans le domaine du traitement de la douleur, et dans le domaine de la prise en charge des urgences intra- et extra-hospitalières. Il sera capable d'intégrer ces techniques dans le cadre d'une prise en charge pré- per- et postopératoire cohérente.

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, and is divided up into two years of foundation studies consisting of a specific university education, followed by three years of extended studies. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

ANES2MC Detailed programme

Programme by subject

Parallel to the practical training, the specialist candidate will follow a university training programme organised as follows :

part - Foundation studies

Inter-university training (75 hours)

Subject matter: General basics in Anaesthetics-Resuscitation.

university studies :

Subjects:

- Risk evaluation : medical pathology as applied to Anaesthetics and Resuscitation.
- Notions of emergency medicine
- Elements of Pharmacology, Biochemistry and Physiology as applied to Anaesthetics-Resuscitation.
- Anatomy and local-regional Anaesthesia
- Metabolism, hydro-electrical equilibrium, kidney functions, endocrine functions, the functions of the nervous system, blood groups.
- Cardiology and peripheral circulation, pneumology and respiratory functions.
- Professional stress management.

part - Extended studies

Inter-university training on intensive care

Subject : looking after intensive care patients

university training

Subjects:

- Anaesthesia-resuscitation of pediatric, cardiac and neurological patients.
- Caring for patients in extreme and chronic pain.
- Post-operative care.
- Experimental approach methodology in anaesthesia-resuscitation

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

ANES2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Admission conditions

- The applicant must hold the degree title of Doctor in Medecine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Anaesthetics-Resuscitation, in a Belgian medical faculty.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer for the public, published on the 14.06.2002, applies to those candidates wishing to obtain the title of specialist doctor in Anaesthetics-Resuscitation (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedure

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Inter-university exam at the end of the second study year.

Further to the application of the Royal Decree of 16 March, 1999, after the first two years of studies, the candidate will receive an attestation proving he has successfully accomplished a specific university training programme.

Evaluation of acquired knowledge at the end of the 5th year by the teaching committee. Ministerial evaluation in the 4th or 5th year. End of course piece of work in the form of a special communication in a scientific meeting or for the publication of an article. Pedagogical dossier of evaluation from the hospital.

Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Anaesthesia - Resuscitation.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
