## DEGE2MC - Introduction

### Introduction

---

## DEGE2MC - Teaching profile

### Learning outcomes

---

The objective of this Advanced 2nd cycle programme is to prepare dentists to gain professional status as general dentists. (Ministerial Decree of 29 March 2002 published 31 May 2002).

### Programme structure

---

The training lasts one year on a full-time basis and is made up of a theoretical part (at least 250 hours) and a practical clinical part (at least 1,250 hours). The placements include duty activities. A dissertation of at least 10 pages must be written on a subject approved by the official committee.

## DEGE2MC Detailed programme

### Programme by subject

---

The theoretical training comprises :

- seminars (180 hours) on integrated approaches to the patient (discussion of treatment plans and case reports where there is possible interaction with other specialized disciplines and general medical disciplines).
- the part, common to all the training programmes, which leads to the award of professional status in dentistry (70 hours). This part comprises training for independent professional practice as well as interactive seminars on the following topics: economic aspects of bucco-dental treatment, the organization and management of a dental surgery, professional regulation and responsibility, dental computer systems, critical analysis of scientific literature, introduction to legal dentistry, introduction to communication, ergonomics, radiodiagnosis including radioprotection, ethological aspects of health care and the relationship between first and second line health care.

The course is taught by an inter-university team of lecturers including the professional associations.

during the clinical training, and in the spirit of combined dentistry, candidates must carry out an adequate number of preventive and rehabilitative treatments on an adequate number of patients and write up the reports. The combined treatments carried out by candidates should include as many disciplines from the basic training as possible.

### The programme's courses and learning outcomes

---

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

## DEGE2MC - Information

### Admission

---

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail*

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

#### General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

---

#### Specific Admission Requirements

Special procedures :

- candidates must have a 'licence' degree or a Master's degree in Dentistry from a Belgian university or a degree recognized as being equivalent by the relevant authorities and be able to practise in Belgium
- candidates must show evidence of having been selected as a generalist at a Belgian faculty of medicine

Further information about the legal requirements and the practical details of the selection examination may be obtained from the office.

The Royal Decree of 30 May 2002 on the availability of dentistry studies, published on 18 June 2002, applies to candidates who wish to gain professional status as general dentists. (These candidates therefore fall into the category of generalists or specialists in the restricted intake.)

Applications should be submitted to the academic in charge of the programme.

## Evaluation

---

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Students' practical and theoretical knowledge is assessed. The dissertation is also assessed.

When the above requirements have been fulfilled, the programme committee will award the academic qualification of Advanced Master in General Dentistry. This is not a substitute for recognition by the ministerial committee. It is evidence of academic and scientific training in the context of specialized training leading to the award of professional status.
