## ORL2MC - Introduction

### Introduction

---

## ORL2MC - Teaching profile

### Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of specialist Doctor in Otorhinolaryngology (Ministerial decree of 08.12.1980, published on 03.03.1981, modified by the Ministerial Decree of 27.11.1995, published on 22.12.1995).

### Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, consisting of two years of foundation studies and three years for the higher training. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

## ORL2MC Detailed programme

### Programme by subject

Parallel to the practical training, the candidate specialist will follow a university course organised as follows :

#### part - Foundation studies

- Theoretical courses: Audio-vestibulology (1st part ), pathology and surgery of the Ear (1st part), pathology and surgery of the nostrils and sinus (1st part), pathology and surgery of the pharynx, larynx cervical region. Phoniatriy (1st part)
- Hospital training : Otorhinolaryngology polyclinic and turns on otorhinolaryngology wards

#### Options

- > LOGO2212 Audiologie[22.5h] (in French) Naima Deggouj
- > LOGO2123 Anatomo-physiologie de la phonation et de la déglutition[30h] (in French) Marc Remacle
- > MEX2100 Problèmes d'expertise médicale spécialisée[69.5h] (in French) Pierre Bernard, Frédéric Bonbled (coord.), Jacques Donnez, Jean-Yves Hayez, Philippe Knoops, Jean-Paul Roussaux, Arlette Seghers (supplée Jean-Paul Roussaux), Michel Thone, Romain Vanwijck
- > ORL2112 Consultations journalières en oto-rhino-laryngologie[15h] (in French) Michel Gersdorff, Marc Hamoir
- > MDTR3150 Leçons d'oto-rhino-laryngologie[15h] (in French) Marc Remacle

#### In addition:

15 hours of interuniversity conferences on Otorhinolaryngology  
40 hours of meetings of the Royal Belgian Otorhinolaryngology and cervico-facial surgery.

The student may also follow courses given in other specialities, subject to the approval of the President of the Committee.

#### part - Higher studies

- Theoretical courses : Audio-vestibulology (2nd part), Pathology and surgery of the Ear (2nd part), Pathology and surgery of the nostrils and sinus (2nd part), Pathology and surgery of the pharynx, larynx cervical region. (2nd part), Phoniatriy (2nd part).
- Seminars : Seminar on Otorhinolaryngology.
- Hospital training : Operation demonstrations of Otorhinolaryngology.

#### In addition:

15 hours of interuniversity conferences on Otorhinolaryngology  
40 hours of meetings of the Royal Belgian Otorhinolaryngology and cervico-facial surgery

### The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

## ORL2MC - Information

### Admission

---

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail*

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

#### General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

---

### Specific Admission Requirements

#### Admission conditions

- The applicant must hold the degree title of Doctor in Medecine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Otorhinolaryngology, in a Belgian medical faculty.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of 30.05.2002, relating to the planning of the medical offer for the public, published on 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Otorhinolaryngology (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

#### Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

## Evaluation

---

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

The student needs to fill in an ongoing report of his work experience detailing all the scientific and didactic activities followed during the course of each year of training. Evaluation of the knowledge acquired is carried out in the form of an oral exam at the end of the first and second part of the studies. An end of course piece of work (based on a publication) is required and is presented orally before the teaching committee during the second session of exams.

Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training course. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Otorhinolaryngology.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of a specialised training programme leading to this validation.
