## FARM1BA - Introduction

## FARM1BA - Teaching profile

### Learning outcomes

Students enrolled on the the Bachelor in Pharmacy course are preparing for the training offered in the Master in Pharmacy programme, on completion of which they will achieve the title of pharmacist. The aim of the programme is therefore to help the students become medication specialists able to improve patient health.

The training in the first year of the Bachelor programme is based on an in-depth study of the basic sciences (chemistry, biology, physics, anatomy, etc.) used in the context of pharmacy.

In the second year, the pharmaceutical element increases significantly, in particular via the study of pharmacology, medicinal plants, and an introduction to analytical chemistry and the chemical synthesis of medications.

The final year of the Bachelor programme further reinforces the foundation in pharmacy and initiates students into a work environment (compulsory work placement in a field of the student's choice). The programme as a whole enables students to acquire a base of knowledge and expertise in the basic sciences, as well as specialist training in pharmacy.

During the three years of the Bachelor's course, by coming to a better understanding of the use of a medication and its effect on the body, the students will develop their training and professional projects, which they will pursue throughout the Master's programme, with increasing independence.

**On successful completion of this programme, each student is able to :**

#### **1. Demonstrate pharmaceutical expertise: use a body of concepts and knowledge in pharmacy and health**

1a. Display command and understanding of the fundamental principles and essential concepts of the basic sciences in the practice of pharmacy.

1b. Assimilate knowledge of chemistry, physicochemistry, biochemistry, pharmacognosy and pharmacology useful in the synthesis, design and analysis of medications.

1c. Incorporate knowledge of anatomy, physiology, immunology, microbiology, nutrition, pharmacology and pharmacokinetics, pathology, medical biology, semiology and psychology in order to understand the action of a medication on the body and plan its use.

#### **2. Scientific approach: resolve pharmaceutical problems by using their knowledge and critical thinking**

2a. Understand a defined pharmaceutical problem or issue.

2b. Display command of the relevant tools and sources of information related to the problem or issue concerned.

2c. Analyse, interpret and compare the information in a robust manner.

2d. Summarise the fundamental and necessary elements related to the problem or issue concerned.

2e. Implement an experiment protocol to formulate, produce and characterise a medication.

2f. Learn how to work in a team.

#### **3. Communication: communicate in an effective, robust and respectful manner from a professional perspective**

3a. Tailor the communication to obtain and provide clear, complete and accurate information (verbal and/or written) in accordance with the relevant standards, if necessary in another language.

3b. Use information and communication technologies appropriately.

#### **4. Sense of responsibility: act in an ethical and responsible manner**

4a. Observe the rules of safety and professional best practice in a scientific context.

4b. Adopt ethical values and comply with scientific and professional agreements.

4c. Understand and respect the limits of their remit.

4d. Conduct themselves as responsible actors in their areas of expertise.

**5. Quality: carry out self-assessment, supplement their knowledge and adapt their approach**

5a. Develop a self-assessment approach to define their training needs in order to respond to specific situations.

5b. Utilise the individual and collective training tools in a robust and independent manner.

5c. Adapt to a variety of learning situations and take advantage of them while managing stress.

## o Du médicament (37 credits)

○ WFARM1004	The molecular aspect of drugs	Mohamed.Ayadim Raphaël.Frederick (coord.)	15h+15h	2 Credits	2q	x		
○ WFARM1008	Design of the drug	Olivia.Dalleur (compensates) Véronique Préat Severine.Henrard	15h+15h	2 Credits	2q	x		
○ WFARM1232	General Pharmacology	Emmanuel.Hermans	15h+7.5h	2 Credits	1q		x	
○ WFARM1237	Introduction botanique à la pharmacognosie 1re partie	Francois.Chaumont Stephan.Declerck	22.5h +15h	3 Credits	1q		x	
○ WFARM1238	Introduction botanique à la pharmacognosie 2e partie	Joelle.Leclercq Muriel.Quinet (compensates) Renate Wesselingh Renate.Wesselingh	22.5h +15h	3 Credits	2q		x	
○ WFARM1302	Pharmaceutical organic chemistry	Raphaël.Frederick (coord.) Didier.Lambert	45h+30h	6 Credits	1q			x
○ WFARM1307	Physical pharmacy	Tom.Leyssens	15h	2 Credits	1q			x
○ WFARM1332	Pharmacologie générale, 2e partie	Chantal.Dessy Marie-Paule.Mingeot	36h	4 Credits	1q			x
○ WFARM1304	Pharmacognosy : a) phytochemistry - b) medicinal plants	Joelle.Leclercq	45h+30h	6 Credits	2q			x
○ WFARM1300	Pharmacocinétique et métabolisme des xénobiotiques	Laure.Bindels (compensates) Nathalie.Delzenne Nathalie.Delzenne Laure.Elens	30h+30h	4 Credits	1q			x
○ WFARM1310	Inorganic drugs with use diagnosis and therapeutic	Bernard.Gallez	30h	3 Credits	2q			x

## o L'homme et la société, l'individu dans le monde professionnel (6 credits)

○ WFARM1160	Philosophy	Mylene.Botbol	30h	3 Credits	1q	x		
-------------	------------	---------------	-----	-----------	----	---	--	--

						Year		
						1	2	3
○ LANGL1854	Medical English	Michaël.Grare Carlo.Lefevre (coord.) Nevin.Serbest	30h	3 Credits	2q	x		

### ○ Mineure (30 credits)

En complément de la majeure, l'étudiant a le choix entre (1) la mineure d'approfondissement en sciences pharmaceutiques, (2) la mineure d'approfondissement en sciences pharmaceutiques -recherche-, (3) une mineure d'ouverture proposée par d'autres programmes, à raison de 15 crédits en BAC2 et 15 crédits en BAC3.

### ⊗ Additional module in Pharmacy (30 credits)

#### ○ En deuxième année de bachelier

L'étudiant est tenu de suivre les cours suivants

○ LANGL1855	Medical English	Timothy.Byrne (coord.) Carlo.Lefevre (coord.)	30h	3 Credits	1 ou 2q		x	
○ WFARM1219	Biophysics applied to the drugs	Bernard.Gallez (coord.) Marie-Paule.Mingeot	30h+15h	3 Credits	1q		x	
○ WFARM1247	Traitement statistique des données	Celine.Bugli (compensates Ingrid Van Keilegom) Ingrid.Vankeilegom	15h+15h	3 Credits	2q		x	
○ WFARM1239	Computerized workshop and research on scientific information related to drugs.	Patrice.Cani	5h+10h	2 Credits	1q		x	
○ WMD1200T	Eléments d'épidémiologie (théorie)		20h	2 Credits	2q		x	
○ WMDS1213G	Psychologie générale et médicale (partim psychologie générale)		15h	2 Credits	1q		x	

#### ○ En troisième année de bachelier

Dans le cadre de la mineure d'approfondissement en sciences pharmaceutiques, l'étudiant est tenu de choisir l'une des deux possibilités suivantes. Un transfert vers le programme de la mineure d'approfondissement en sciences pharmaceutiques - recherche est toutefois possible.

#### ⊗ Poursuite de l'approfondissement (15 credits)

○ WFARM1309	Introduction to the pharmaceutical world, including internships	Valerie.Lacour Marie-Paule.Mingeot (coord.) Giulio.Muccioli Stefanie.Quennery Rita.Vanbever Pierre.Wallemacq	7.5h	5 Credits	2q			x
○ WFARM1349	Integrated Seminar in Pharmaceutical Sciences	Nathalie.Delzenne Emmanuel.Hermans (coord.) Benedicte.Jordan Didier.Lambert Marie-Paule.Mingeot Giulio.Muccioli	0h+45h	4 Credits	2q			x

#### ○ Cours au choix de l'approfondissement FARM (6 credits)

L'étudiant choisit des cours dans la liste ci-dessous pour une valeur de 6 crédits. Ces cours spécifiques de la filière en sciences pharmaceutiques permet à l'étudiant d'approfondir ses acquis dans divers domaines relatifs entre autres au développement, à l'analyse et à la pharmacocinétique des médicaments d'origine synthétique ou naturelle.

⊗ WFARM1319	Pharmacognosy, case studies	Joelle.Leclercq	15h	2 Credits	2q			x
⊗ WFARM1329	Advanced instrumental analysis	Marie-France.Herent Giulio.Muccioli (coord.)	0h+30h	2 Credits	2q			x
⊗ WFARM1339	Compléments de pharmacocinétique	Laure.Elens	15h	2 Credits	2q			x
⊗ WFARM1359	Drug design en chimie pharmaceutique	Raphael.Frederick (coord.) Didier.Lambert	15h	2 Credits	2q			x
⊗ WFARM1369	Evaluation de la biodistribution et de l'effet d'un médicament par des méthodes non invasives	Bernard.Gallez	15h	2 Credits	2q			x
⊗ WFARM1379	Seminars of Clinical Chemistry	Vincent.Haufroid Teresinha.Leal Marianne.Philippe Marie-Francoise.Vincent Pierre.Wallemacq (coord.)	0h+30h	2 Credits	2q			x

						Year		
						1	2	3
⌘ WFARM1370	Formation à la communication scientifique	Timothy.Byrne (coord.) Olivia.Dalleur Barbara.Reutemann (compensates Olivia Dalleur)	15h+30h	4 Credits	2q			x

#### ⌘ Formation minimale à l'étranger (15 crédits)

L'étudiant qui réalise une partie de son parcours à l'étranger (de l'ordre de 30 crédits) pourra intégrer une partie de ce parcours dans son programme, en lieu et place des 15 crédits de sa mineure d'approfondissement en sciences pharmaceutiques.

○ WFARM1399	Formation minimale à l'étranger (ERASMUS)			15 Credits				x
----------------	---	--	--	------------	--	--	--	---

### ⌘ Additionnal module in Pharmacy - Research (30 credits)

#### ○ Deuxième année de bachelier (15 crédits)

##### ○ Cours obligatoires

L'étudiant est tenu de suivre les cours suivants.

○ LANGL1855	Medical English	Timothy.Byrne (coord.) Carlo.Lefevre (coord.)	30h	3 Credits	1 ou 2q		x	
○ WFARM1219	Biophysics applied to the drugs	Bernard.Gallez (coord.) Marie-Paule.Mingeot	30h+15h	3 Credits	1q		x	
○ WFARM1247	Traitement statistique des données	Celine.Bugli (compensates Ingrid Van Keilegom) Ingrid.Vankeilegom	15h+15h	3 Credits	2q		x	
○ WFARM1239	Computerized workshop and research on scientific information related to drugs.	Patrice.Cani	5h+10h	2 Credits	1q		x	
○ WMD1200T	Eléments d'épidémiologie (théorie)		20h	2 Credits	2q		x	
○ WMDS1213G	Psychologie générale et médicale (partim psychologie générale)		15h	2 Credits	1q		x	

#### ○ Troisième année de bachelier (15 crédits)

Dans le cadre de la mineure d'approfondissement en sciences pharmaceutiques - recherche, l'étudiant est tenu de choisir l'une des deux possibilités suivantes. Un transfert vers le programme de la mineure d'approfondissement en sciences pharmaceutiques est toutefois possible.

○ WFARM1380	Introduction à la recherche pharmaceutique y compris stage			7 Credits				x
○ WFARM1311	Projet expérimental personnel			8 Credits	2q			x

#### ⌘ Formation minimale à l'étranger (15 crédits)

L'étudiant qui réalise une partie de son parcours à l'étranger (de l'ordre de 30 crédits) pourra intégrer une partie de ce parcours dans son programme, en lieu et place des 15 crédits de sa mineure d'approfondissement en sciences pharmaceutiques.

○ WFARM1399	Formation minimale à l'étranger (ERASMUS)			15 Credits				x
----------------	---	--	--	------------	--	--	--	---

### ⌘ Mineure d'ouverture (30 crédits)

○	Mineure d'ouverture Voir la liste ci-dessous.			15 Credits				x
○	Mineure d'ouverture L'étudiant poursuit la mineure d'ouverture choisie en 2e année dans la liste ci-dessous.			15 Credits				x

## List of available minors

---

During the bachelor's of Pharmaceutical Sciences, the student has the opportunity to further his knowledge in the various pharmaceutical domains, by selecting in-depth study options.

Instead of these options, the bachelor's programme may likewise include an option of a "minor", which will enable the student to open up new horizons. Minors in the following subjects : Biology, Chemistry, Law, Economics, Human Nutrition, Clinical Biomedical Sciences, Statistics, etc., may be envisaged, subject to the approval of the Teaching Committee of the School of Pharmacy.

- > **Additional module in Pharmacy** [ <https://www.uclouvain.be/en-prog-2016-app-wfarm100p> ]

## Course prerequisites

A document entitled [en-prerequis-2016-farm1ba.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

## The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

○ WFARM1304	Pharmacognosy : a) phytochemistry - b) medicinal plants ■	Joelle.Leclercq	45h+30h	6 Credits	2q
○ WFARM1300	Pharmacocinétique et métabolisme des xénobiotiques ■	Laure.Bindels (compensates) Nathalie.Delzenne Nathalie.Delzenne Laure.Elens	30h+30h	4 Credits	1q
○ WFARM1310	Inorganic drugs with use diagnosis and therapeutic ■	Bernard.Gallez	30h	3 Credits	2q

**○ Mineure**

En complément de la majeure, l'étudiant a le choix entre (1) la mineure d'approfondissement en sciences pharmaceutiques, (2) la mineure d'approfondissement en sciences pharmaceutiques -recherche-, (3) une mineure d'ouverture proposée par d'autres programmes, à raison de 15 crédits en BAC2 et 15 crédits en BAC3.

**⊗ Additionnal module in Pharmacy****○ En troisième année de bachelier**

Dans le cadre de la mineure d'approfondissement en sciences pharmaceutiques, l'étudiant est tenu de choisir l'une des deux possibilités suivantes. Un transfert vers le programme de la mineure d'approfondissement en sciences pharmaceutiques - recherche est toutefois possible.

**⊗ Poursuite de l'approfondissement**

○ WFARM1309	Introduction to the pharmaceutical world, including internships 🟡	Valerie.Lacour Marie-Paule.Mingeot (coord.) Giulio.Muccioli Stefanie.Quennery Rita.Vanbever Pierre.Wallemacq	7.5h	5 Credits	2q
○ WFARM1349	Integrated Seminar in Pharmaceutical Sciences 🟡	Nathalie.Delzenne Emmanuel.Hermans (coord.) Benedicte.Jordan Didier.Lambert Marie-Paule.Mingeot Giulio.Muccioli	0h+45h	4 Credits	2q

### ○ Cours au choix de l'approfondissement FARM

L'étudiant choisit des cours dans la liste ci-dessous pour une valeur de 6 crédits. Ces cours spécifiques de la filière en sciences pharmaceutiques permet à l'étudiant d'approfondir ses acquis dans divers domaines relatifs entre autres au développement, à l'analyse et à la pharmacocinétique des médicaments d'origine synthétique ou naturelle.

⌘ WFARM1319	Pharmacognosy, case studies 🟡	Joelle.Leclercq	15h	2 Credits	2q

---	---	--	--	------------	--

## FARM1BA - Information

### Admission

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.  
The admission requirements must be met prior to enrolment in the University.

**In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail**

- > [General requirements](#)
- > [Specific requirements](#)
- > [Knowledge of the French language exam](#)
- > [Special requirements](#)

### General requirements

Except as otherwise provided by other specific legal provisions, admission to undergraduate courses leading to the award of a Bachelor's degree will be granted to students with one of the following qualifications :

1. A Certificate of Upper Secondary Education issued during or after the 1993-1994 academic year by an establishment offering full-time secondary education or an adult education centre in the French Community of Belgium and, as the case may be, approved if it was issued by an educational institution before 1 January 2008 or affixed with the seal of the French Community if it was issued after this date, or an equivalent certificate awarded by the Examination Board of the French Community during or after 1994;
2. A Certificate of Upper Secondary Education issued no later than the end of the 1992-1993 academic year, along with official documentation attesting to the student's ability to pursue higher education for students applying for a full-length undergraduate degree programme;
3. A diploma awarded by a higher education institution within the French Community that confers an academic degree issued under the above-mentioned Decree, or a diploma awarded by a university or institution dispensing full-time higher education in accordance with earlier legislation;
4. A higher education certificate or diploma awarded by an adult education centre;
5. A pass certificate for one of the [entrance examinations](#) organized by higher education institutions or by an examination board of the French Community; this document gives admission to studies in the sectors, fields or programmes indicated therein;
6. A diploma, certificate of studies or other qualification similar to those mentioned above, issued by the Flemish Community of Belgium (this qualification does not grant exemption from the [French language proficiency examination](#)), the German Community of Belgium or the Royal Military Academy;
7. A diploma, certificate of studies or other qualification obtained abroad and deemed equivalent to the first four mentioned above by virtue of a law, decree, European directive or international convention;

Note:

Requests for equivalence must be submitted no later than 14 July 2016 to the Equivalence department ([Service des équivalences](#)) of the Ministry of Higher Education and Scientific Research of the French Community of Belgium.

The following two qualifications are automatically deemed equivalent to the Certificate of Upper Secondary Education (Certificat d'enseignement secondaire supérieur – CESS):

- European Baccalaureate issued by the Board of Governors of a European School,
- International Baccalaureate issued by the International Baccalaureate Office in Geneva.

These two qualifications do not, however, provide automatic exemption from the [French language proficiency examination](#).

8. Official documentation attesting to a student's ability to pursue higher education (diplôme d'aptitude à accéder à l'enseignement supérieur - DAES), issued by the Examination Board of the French Community.

### Specific requirements

#### **Admission to undergraduate studies on the basis of accreditation of knowledge and skills obtained through professional or personal experience (Accreditation of Prior Experience)**

Subject to the general requirements laid down by the authorities of the higher education institution, with the aim of admission to the undergraduate programme, the examination boards accredit the knowledge and skills that students have obtained through their professional or personal experience.

This experience must correspond to at least five years of documented activity, with years spent in higher education being partially taken into account: 60 credits are deemed equivalent to one year of experience, with a maximum of two years being counted. At the end of

an assessment procedure organized by the authorities of the higher education institution, the Examination Board will decide whether a student has sufficient skills and knowledge to successfully pursue undergraduate studies.

After this assessment, the Examination Board will determine the additional courses and possible exemptions constituting the supplementary requirements for the student's admission.

---

### Exam of knowledge of the French language

Anyone not demonstrating sufficient [French language proficiency](#) will not be admitted to the first-year undergraduate examinations.

---

## Special requirements

- Admission to **undergraduate studies in engineering: civil engineering and architect**

Pass certificate for the [special entrance examination for undergraduate studies in engineering: civil engineering and architect](#).

Admission to these courses is always subject to students passing the special entrance examination. Contact the faculty office for the programme content and the examination arrangements.

- Admission to **undergraduate studies in veterinary medicine**

[Admission to undergraduate studies in veterinary medicine is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in physiotherapy and rehabilitation**

[Admission to undergraduate studies in physiotherapy and rehabilitation is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in psychology and education: speech and language therapy**

[Admission to undergraduate studies in psychology and education: speech and language therapy is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in medicine and dental science**

[Admission to undergraduate studies in medicine and dental science is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

Note: students wishing to enrol for a **Bachelor's degree in Medicine** or a **Bachelor's degree in dental science** must first sit [an aptitude test \(fr\)](#).

---

## Règles professionnelles particulières

---

### Teaching method

---

The training provided in the Bachelor in Pharmacy programme is based on a variety of teaching methods enabling an integrated approach to the theoretical and practical aspects of the different disciplines with regard to medication.

The theory courses are aimed at developing a specialised knowledge base, using practical examples illustrating the complexity of pharmacy. Most of the theory courses are also associated with practical laboratory work, exercises and seminars during which the students are actively engaged in their training.

Several teaching units invite the students to learn about pharmacy through individual or group work. The aim of such work is to develop skills in self-learning, summarising and communication.

Finally, through work placements in a professional environment, the Bachelor in Pharmacy training enables the students to discover for themselves the various aspects of the pharmacist's job. The theory-based and practical training involves pharmacy experts throughout the academic programme. This specialist supervision ensures a balance between the expected learning outcomes and current expectations of society in the field of pharmacy.

### Evaluation

---

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Each course is subject to one or more evaluations, in the form of written and/or oral exams, organised in two main sessions: one in January and the other in June. The September session is a re-sit opportunity. The specific details of the exam are communicated to the students at the start of each course. These evaluations are intended to assess the learning outcomes defined in the course objectives.

With regard to the practical elements of the training (practicals, seminars and projects), the evaluation is ongoing and may include a final assessment. It places the emphasis on expertise in the fields of health science and pharmacy and on the students' ability to tackle a pharmaceutical problem using a scientific approach. The evaluation of certain seminars and work is aimed at appraising the incorporation of the different pharmacy disciplines by the students.

### Possible trainings at the end of the programme

---

#### Positioning of the programme within the University cursus

The bachelor's degree entitles access to the master's of Pharmaceutical Sciences. Complementary masters with a professional vocation are organised in the practice of industrial pharmacy, clinical biology, hospital pharmacy, clinical hospital pharmacy, pharmaceutical technology.

#### Other studies accessible upon completion of the programme

Other masters within the Faculty of Medicine, as well as some programmes from other faculties, may be accessible subject to certain prerequisites.
