KINE2M1 - Introduction

Introduction

KINE2M1 - Teaching profile

Learning outcomes

Physiotherapy is, literally, 'treatment through movement'. As the profession has developed, physiotherapists are not only called on to treat problems in movement, but also neurological, respiratory and cardiac problems.

By the end of the course, students in physiotherapy will have acquired the skills enabling him to restore, in the best way possible, the functional capacities of a sick, injured or handicapped person.

The training is also designed to develop a critical attitude based on solid scientific knowledge which enables graduates to justify their professional practices and update them. Training in rehabilitation will also enable them to suggest appropriate solutions for reintegrating handicapped people into their family, social and professional environments.

The Master in Physiotherapy and Rehabilitation is centred on acquiring and developing specific skills in physiotherapy in various areas of application (orthopaedic, neurological, respiratory, uro-gynaecological, cardio-vascular, psychiatric, pediatric, geriatric etc). Graduates are awarded the professional status of physiotherapist in the French Community of Belgium.

On successful completion of this programme, each student is able to :

1. maitriser de manière intégrée des savoirs et des savoir-faire complexes (méthodologiques, techniques et pratiques), par le biais d'une recherche, dans le cadre de travaux et d'un mémoire lui permettant d'intervenir et de résoudre des problèmes qui relèvent du domaine de la kinésithérapie et réadaptation.

1.1. Enoncer les référentiels théoriques majeurs qui sous-tendent l'action (en sciences humaines, sciences exactes, sciences biomédicales et dans la formation spécifique à la kinésithérapie et réadaptation).

1.2. Démontrer un savoir-faire pratique, technique, méthodologique dans ces domaines.

1.3. Exercer sa propre activité en kinésithérapie et réadaptation dans le but d'accéder à un niveau de maîtrise indispensable à une bonne intervention.

1.4. Articuler et intégrer ces différents champs de connaissances (interdisciplinarité).

2. intervenir efficacement et résoudre des problèmes complexes dans les domaines de la kinésithérapie et réadaptation en s'appuyant sur une démarche autonome et un raisonnement scientifiques.

2.1. Identifier les besoins des patients en kinésithérapie et réadaptation (amont de l'action).

2.2. Organiser l'intervention en kinésithérapie et réadaptation en l'adaptant aux besoins des patients par l'observation, l'évaluation et le réajustement (pendant l'action).

2.3. Evaluer les résultats de ses interventions (observation structurée sur la base des connaissances), analyser ses pratiques en développant la dimension réflexive (aval de l'action) et améliorer, le cas échéant, ses interventions futures.

3. adapter sa communication aux objectifs d'intervention en kinésithérapie et réadaptation, aux caractéristiques des interlocuteurs (patients et professionnels de la kinésithérapie et réadaptation et de la santé) et du contexte (présenter, commenter, accompagner, coordonner,...).

3.1. Expliquer et argumenter ses avis et ses points de vue à ses interlocuteurs (patients et les professionnels de la kinésithérapie et réadaptation).

3.2. Dialoguer de façon efficace et adaptée avec ses interlocuteurs (patients et les professionnels de la kinésithérapie et réadaptation), en faisant preuve de capacité d'écoute, d'empathie et d'assertivité.

3.3. Utiliser efficacement différentes techniques et divers outils de communication (supports visuels, présentation, langages verbal et corporel, ...).

4. collaborer avec les autres professionnels de la santé pour atteindre des objectifs communs et produire des résultats positifs.

4.1. Percevoir l'impact du contexte sur la dynamique des groupes de professionnels de la kinésithérapie et réadaptation et de la santé (temps, lieu et infrastructure, type d'activité, climat organisationnel, ...) et sur les situations où l'activité en équipe est préférable à l'activité individuelle, et vice et versa. Il agit en conséquence de ce qu'il perçoit.

5. développer son autonomie et se construire un projet professionnel dans une logique de développement continu.

5.1. Développer des stratégies pour s'adapter à un environnement professionnel et identifier des éléments de bien-être au travail.

5.2. Intégrer de manière autonome de nouvelles compétences en relation avec la kinésithérapie et réadaptation.

5.3. Incrire sa formation dans le temps, affiner ses projets professionnels et préparer son entrée en carrière.

6. se comporter en intervenant responsable en mettant en œuvre un savoir-être professionnel dans le respect de la législation en vigueur, de l'éthique et de la déontologie professionnelle.

6.1. Contribuer aux débats et controverses actuels dans le domaine de la kinésithérapie et réadaptation, e.a. ceux qui touchent au bien-être et à la santé.

6.2. Justifier aussi ses interventions sur la base de sa réflexion sur l'impact social des progrès scientifiques dans les domaines de la kinésithérapie et réadaptation.

6.3. Dans une approche éthique et déontologique, rester vigilant en toutes circonstances à la justesse de sa relation aux patients, aux professionnels de la kinésithérapie et réadaptation et de la santé.

Programme structure

Having completed a bachelor's degree, the one year training programme for the Master in Physiotherapy and Rehabilitation [60] entitles you to the professional status of physiotherapist in the French Community of Belgium.

Practical learning

During the Master, you will continue, in an intensive way, the training begun in the third year of the first cycle. You will do four months of placement in the university clinics and approved UCL and KUL centres, under the direction of teachers in physiotherapy and rehabilitation and under the supervision of placement directors. You will be able to match your choice of placement to your interests and preferences: hospital departments, outpatient treatment or private practice.

Specializing

You will be able to develop your knowledge in one of the following areas : technological aids for handicapped people, prevention of pathologies linked with working conditions and adapted physical activities used as additional therapy.

The dissertation that you will do at the end of the course will also enable you to specialize in an advanced area of physiotherapy or rehabilitation. The dissertation may be an account of a particular issue, through bibliographic research, or be centred on experimental research in the laboratory. You will benefit from close collaboration and a privileged learning relationship with your supervisor.

KINE2M1 Detailed programme

Programme by subject

CORE COURSES [60.0]

● Mandatory

△ Courses not taught during 2017-2018

⊕ Periodic courses taught during 2017-2018

☒ Optional

○ Periodic courses not taught during 2017-2018

■ Activity with requisites

Click on the course title to see detailed informations (objectives, methods, evaluation...)

● Mémoire (15 credits)

● LKINE2199	Mémoire			15 Credits	1 + 2q
-------------	---------	--	--	------------	--------

● Sciences humaines (4 credits)

● LKINE2108	Law, public institutions and management in health care	Sebastien Depré Christine Detrembleur (coord.)	37.5h	2 Credits	1q
-------------	--	---	-------	-----------	----

● Sciences religieuses

L'étudiant choisit un cours parmi les trois cours suivants :

☒ LTECO1001	Questions of religious sciences: biblical readings	Didier Luciani	15h	2 Credits	2q
☒ LTECO1002	Questions of religious sciences: reflections about christian faith	Pierre-Yves Materne	15h	2 Credits	1q
☒ LTECO1003	Questions of Religious Sciences: Questions about Ethics	Dominique Jacquemin	15h	2 Credits	1q

● Sciences biomédicales (3 credits)

● LKINE2127	Compléments de pathologie, physiopathologie et éléments de pharmacologie	Stéphan Clément de Cléty Patrick Durez Alain Luts (coord.) Franck Verschuren	45h	3 Credits	1q
-------------	--	---	-----	-----------	----

● Formation spécifique à la kinésithérapie (15 credits)

● LKINE2138	Complements of Neurology and Neurological physiotherapy	Yannick Bleyenheuft Thierry Deltombe Marie-Cécile Nassogne Michel Ossemann Anne Renders (coord.)	20h+10h	3 Credits	1q
● LKINE2148	Functional evaluation of the patient	Christine Detrembleur Jean-Louis Thonnard (coord.)	30h	3 Credits	1q
● LKINE2158	Specific techniques of physiotherapy including manual therapy, abdomino-pelviperineology, relaxation, psychiatric, vestibular, maxilo-facial, ...	Yves Castille Philippe Mahaudens Laurent Pitance	60h+45h	5 Credits	1q
● LKINE2168	Algology in physiotherapy, palliative care and geriatrics	Marie de Saint Hubert Etienne Masquelier André Mouraux Didier Schoevaerdts (coord.) Annabel Wunsch	60h	4 Credits	1q

o Stages cliniques (20 credits)

● LKINE2189	Stages cliniques (4 mois)			18 Credits	1 + 2q
● LKINE2190	Rapports de stages			2 Credits	1 + 2q

o Cours au choix (3 credits)

Trois crédits à choisir parmi

❖ LKINE2188	Prevention of diseases related to working conditions	Valérie-Anne De Wilde Etienne Masquelier (coord.) Bénédicte Schepens	30h	3 Credits	1q
❖ LKINE2129	Additions in technology and rehabilitation	Guillaume Bastien Christine Detrembleur Christine Detrembleur (compensates Bénédicte Schepens) Bénédicte Schepens Patrick Willems (coord.)	30h	3 Credits	1q
❖ LIEPR2236	Prevention and therapeutical effect of the physical activity on the major chronic diseases	Gilles Caty	30h	3 Credits	1q
❖ LKINE2195	Didactique des enseignements en kinésithérapie, 2e partie	Yves Castille	0h+30h	3 Credits	1q
❖ LKINE2196	Apprentissage moteur et neuroplasticité, module 2	Yannick Bleyenheuft (coord.) Yves Vandermeeren	10h+20h	3 Credits	1q

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

KINE2M1 - Information

Admission

General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..

SUMMARY

- > University Bachelors
- > Non university Bachelors
- > Holders of a 2nd cycle University degree
- > Holders of a non-University 2nd cycle degree
- > Adults taking up their university training
- > Access on the file
- > Admission and Enrolment Procedures for general registration

University Bachelors

Diploma	Special Requirements	Access	Remarks
UCLouvain Bachelors			
Bachelor in Physiotherapy and Rehabilitation		Direct Access	
Bachelor in Motor skills : General		Access with additional training	Accès après 2 années de programme adapté en kinésithérapie et réadaptation
Others Bachelors of the French speaking Community of Belgium			
Bacheliers universitaires en kinésithérapie et réadaptation		Direct Access	
Bacheliers universitaires en sciences de la motricité		Access with additional training	Accès après 2 années de programme adapté en kinésithérapie et réadaptation
Bachelors of the Dutch speaking Community of Belgium			
Bacheliers universitaires en kinésithérapie et réadaptation		Access with additional training	Le candidat peut se voir imposer 1 ou plusieurs enseignements supplémentaires de 15 crédits
Bacheliers universitaires en sciences de la motricité		Access with additional training	Accès après 2 années de programme adapté en kinésithérapie et réadaptation
Foreign Bachelors			
Bacheliers universitaires en kinésithérapie et réadaptation		Access with additional training	Le candidat peut se voir imposer 1 ou plusieurs enseignements supplémentaires de 15 crédits
Bacheliers universitaires en sciences de la motricité		Access with additional training	Accès après 2 années de programme adapté en kinésithérapie et réadaptation

Non university Bachelors

Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
"Licenciés"			
		-	
Masters			

Holders of a non-University 2nd cycle degree

Adults taking up their university training

> See the website Valorisation des acquis de l'expérience (<https://uclouvain.be/fr/etudier/vae>)

It is possible to gain admission to all masters courses via the validation of professional experience procedure.

Les adultes avec une expérience professionnelle pourront s'inscrire au programme sur base d'une procédure d'admission individualisée.

Access on the file

Reminder : all Masters (apart from Advanced Masters) are also accessible on file.

Admission and Enrolment Procedures for general registration

Supplementary classes

To enrol for this Masters, the student must have a good command of certain subjects. If this is not the case, they must add preparatory modules to their Master's programme.

● Mandatory

△ Courses not taught during 2017-2018

⊕ Periodic courses taught during 2017-2018

☒ Optional

∅ Periodic courses not taught during 2017-2018

■ Activity with requisites

Click on the course title to see detailed informations (objectives, methods, evaluation...)

○ Cours du 1er bloc annuel du programme de bachelier en kinésithérapie et réadaptation

● LIEPR1003	Treatment of data	Yannick Bleyenheuft	15h+15h	4 Credits	2q
-------------	-------------------	---------------------	---------	-----------	----

○ Cours du 2e bloc annuel du programme de bachelier en kinésithérapie et réadaptation

● LANGL1851	English for physiotherapists and physical educators	Jean-Luc Delghust Fanny Desterbecq Dominique François Céline Gouverneur Sandrine Meirlaen Jean-Paul Nyssen (coord.)	45h	4 Credits	1 + 2q
● LIEPR1021	Cellular physiology	Marc Francaux	30h	3 Credits	1q
● LIEPR1022	Systems Physiology	Nicolas Tajeddine	37.5h	4 Credits	2q
● LIEPR1024	Fundamentals of neurophysiology and neuropsychology in motor control and motor learning	Julie Duque Marcus Missal (coord.)	45h	5 Credits	1q

○ Cours du 3e bloc annuel du programme de bachelier en kinésithérapie et réadaptation

● LIEPR1025	Physiology and biochemistry of exercise and nutrition	Sonia Brichard Marc Francaux (coord.) Yvan Larondelle	75h+7.5h	8 Credits	2q
● LIEPR1026	Statistics	Céline Bugli	15h+15h	3 Credits	2q
● LKINE1031	Complements physiotherapy and pathology of the musculoskeletal system	Thierry Deltombe (coord.) Pierre-Louis Docquier Philippe Mahaudens Henri Nielens Laurent Pitance Delphine Wautier	20h+14h	3 Credits	2q
● LKINE1036	Complements of Neurophysiology	Julie Duque Yves Vandermeeren	30h	3 Credits	2q
● LKINE1033	Seminar of motor re-education and physiotherapy	Thierry Deltombe Christine Detrembleur (coord.) Julie Duque Thierry Lejeune Jean-Louis Thonnard	0h+7.5h	3 Credits	1q
● LKINE1041	Complements of Pathology and cardio-respiratory physiotherapy	Pierre Delguste (coord.) Jean-Bernard Michotte Gregory Reyhler Xavier Wittebole	30h	3 Credits	2q
● LKINE1300	Méthodologie de la recherche en kinésithérapie et réadaptation	Julie Duque (coord.) Sophie Patris Gregory Reyhler	22.5h	3 Credits	2q
● LKINE1038	Biomechanics applied to physiotherapy	Christine Detrembleur	30h	3 Credits	1q

○ Formation personnalisée

L'étudiant choisit un cours parmi :

☒ LKINE1039	Technology & Rehabilitation	Guillaume Bastien Massimo Penta Patrick Willems (coord.)	45h+15h	4 Credits	2q
☒ LKINE1040	Ergonomy and readaptation	Bénédicte Schepens Jean-Louis Thonnard (coord.)	45h+15h	4 Credits	2q

Teaching method

Master in Physiotherapy and Rehabilitation is centred on acquiring and developing specific skills in physiotherapy in various areas of application (orthopaedic, neurological, respiratory, uro-gynaecological, cardio-vascular, psychiatric, pediatric, geriatric etc). The teaching is done in different ways: lectures, practical courses in small groups, sessions on specialized techniques and clinical placements.

Through the optional subjects, students can develop their knowledge in one of the following areas : technological aids for handicapped people, prevention of pathologies linked with working conditions and adapted physical activities used as additional therapy.

By doing a dissertation, students can specialize in a precise area, either through bibliographic research, or by experimental research in the laboratory : there is close collaboration and a privileged learning relationship with the supervisor.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgeee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

There are three main sessions of examinations : in January, June and September.

Assessment of the theoretical courses is based on a written or oral examination and may be combined and/or replaced by elements of continuous assessment, particularly for the clinical placements.

Assessment of the practical training is continuous and may be supplemented by a final assessment.

Students will be informed of the methods of assessment at the beginning of each course.

Mobility and/or Internationalisation outlook

Certain courses, as well as clinical placements in physiotherapy and rehabilitation may be done in other countries with which the Institute has special relationships : France, Canada, Switzerland and Ireland. Students who are particularly interested in the special issues relating to rehabilitation in the third world may also do a two month placement in Africa (Benin) or in South East Asia (Vietnam, Cambodia and Laos).

Possible trainings at the end of the programme

The Master in Physiotherapy and Rehabilitation gives access to the Master in Motor Skills : General.

This training of 120 credits may be done in one additional year of study. It provides a specialization either by doing a research focus, or a professional focus in manual therapy and physiotherapy.
