Introduction
Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Stomatology (Ministerial Decree of 26.04.1982, published on 01.07.1982).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years: 3 years of foundation studies and 2 years of higher studies. During the first 3 years of basic training, the candidate will follow all the courses and take all the exams of the three undergraduate years in Dental Sciences. He will be exempt from doing these if he already a graduate in Dental Sciences, and will, in that case, be authorised to immediately embark on his higher study programme. Besides the theoretical activities and clinical practices, during each one of the five years, the candidate will have to present personally written scientific pieces of work either orally or in writing, before societies or in scientific reviews. All of the candidate's activities will be attested by means of his apprenticeship record report and the "ongoing" evaluation of these will take place twice a year (see below).

The apprenticeship project established by the universitypromoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.
STOM2MC Detailed programme

The programme's courses and learning outcomes

For each UCL training programme, a reference framework of learning outcomes specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"
Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

SUMMARY

• General requirements
• Specific Admission Requirements

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master’s degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master’s (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Admission conditions

• The applicant must hold the degree title of Doctor in Medicine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
• The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Stomatology, in a Belgian medical faculty. The juridical context and practical procedures regarding these selection tests can be obtained from the secretary’s office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of 30.05.2002, relating to the planning of the medical offer for the public, published on 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Stomatology (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.
**Evaluation**

The evaluation methods comply with the regulations concerning studies and exams (https://uclouvain.be/fr/decouvrir/rgee.html). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading “Learning outcomes evaluation method”.

Theoretical and practical exams of the three undergraduate years in Dental Sciences (DENT 21, 22 et 23). “Ongoing” evaluation carried out by the practical training supervisor every six months, also taking into consideration the “savoir,” the “savoir-être” and the “savoir-faire” of the candidate.

At the end of the first two years (FUS) of the foundation studies and in conformity with the Ministerial Decree of 16 March, 1999, an oral evaluation, by a jury composed of all the work experience supervisors and the members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery is carried out and involves:

- the presentation of 3 clinical cases
- the resolution and discussion of a clinical case presented by the jury
- an average score of 60% is needed and is sufficient for passing this exam; in case of failure, the candidate is authorised to retake the exam once again within 3 months, but in August at the latest (possibly after a complement of training depending on the directives of the jury). The final evaluation is carried out by a jury composed of the university and non-university practical training supervisors, and by members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery and involves:
  - Theory: theoretical questions from the European Board
  - Clinical studies: presentation of clinical cases personally diagnosed and treated
  - Practical studies: resolution of clinical cases presented by the members of the jury
  - Scientific cases: scientific pieces of work, published and/or presented before scientific societies.

Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Stomatology. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
