ETHI2M - Introduction

Introduction

ETHI2M - Teaching profile

Learning outcomes

The holder of the Master [120] in Ethics prepares to become a citizen and contributor capable of assisting societal actors to respond, on a reasoned and informed basis, to ethical questions posed to them. The UCL philosophy faculty offers its students a programme which will enable them to meet this challenge at the end of their studies.

In order to achieve this objective, students will need the following main virtues:

- the ability to examine transforming movements in modern society by applying critical thought to the phenomena embodying them;
- the ability to analyse ethical questions which raise decision-making processes and practices, but at an individual level and a social and political level;
- the ability to construct a reasoned and informed position in respect of these questions;
- the ability to assist social actors by calling for responsibility as regards these ethical questions.

Generally, at the end of the master, students will have developed a spirit of criticism, faculty of analysis and review, intellectual creativity, a sense of tolerance and dialogue as well as an ability to debate ethical questions. These qualities, encouraged by critical reflection skills exercises, knowledge of the theories, concepts and methods involved in philosophical ethics, practice in reasoning as well as exchanges with other disciplines and their actors, are highly valued in various professions (diplomacy, journalism, human resource management, teaching, etc.).

On successful completion of this programme, each student is able to :

1. Demonstrate an expert and critical understanding of theories, concepts and methods in the domain of philosophical ethics and how they are connected to other fields of philosophy and scientific disciplines.
 - 1.1. Appropriate a range of theories, concepts and methods.
 - 1.2. Make theoretical and methodological choices in view of their relevance in dealing with ethical questions and be able to explain their founding principles and limitations.
 - 1.3. Compare the contributions of philosophical ethics to those of the humanities.
2. Discern and deal with ethical questions in a methodological manner, on a philosophically-grounded and scientifically informed basis.
 - 2.1. Determine and analyse ethical questions which raise decision-making processes and practices at an individual, social or political level.
 - 2.2. Clarify the socio-anthropological assumptions and normative principles on which the positions and possible arguments relating to these questions are grounded.
 - 2.3. Compare these positions and arguments to the contributions of scientific disciplines.
 - 2.4. Take an educated and critical position in relation to these questions.
3. Create and realize individual research (dissertation) implementing a rigorously methodological and critical approach in order to go deeper into an ethical research question.
 - 3.1. Carry out a critical review of the literature on this question, making effective, critical and appropriate use of IT and primary and secondary ethical and philosophical sources.
 - 3.2. Implement a rigorous methodological analysis approach relevant to the question.
 - 3.3. Challenge and defend the ethical theories which arise from that question.
 - 3.4. Carry out an analysis of them and draw a conclusion which is relevant both in relation to the debates between specialists in the field and its practical efficacy.
 - 3.5. Take and argue an educated and critical position in relation to that question.
4. Communicate, discuss and hold constructive debates, orally and in writing, with different actors (specialists and non-specialists) involved in a given situation where ethical questions are posed.
 - 4.1. Communicate, orally and in writing, on complex subjects (data, points of view and conclusions as well as the underlying knowledge and principles) in a clear, structured fashion, reasoned in accordance with the specific standards of communication relevant to the context and by adapting their presentations to the target audience and aims being pursued.
 - 4.2. Communicate, orally and in writing, original scientific results to specialists in the field of research concerned and discuss them critically.
 - 4.3. Converse respectfully and constructively with various counterparts, demonstrating an ability to listen, open-mindedness and tolerance.
 - 4.4. Contribute constructively to public debate (for example, in the media): recognise and take into consideration different points of view and ways of thinking, bring their own ethics-based points of view to the debate and participate constructively in order to develop solutions from the citizen's point of view.
5. Act as an academic and critical and responsible actor demonstrating "analytical distance" based upon philosophical reflection, and within an ethos of discussion.
6. **If the "Public Ethics and Policies" elective is chosen**, implement the skills referred to above in the development, implementation and evaluation of public policies.
7. **If the "Sciences and Techniques" elective is chosen**, implement the skills referred to above in the development and application of scientific theories as well as in the innovation and use of techniques.

8. If the “**Biomedical Ethics and Bioethics**” elective is chosen, implement the skills referred to above in the fields of medical practice, health policy and operations on living beings.

9. If the “**Ethics, Norms and Societies**” elective is chosen, implement the skills referred to above in a reflection on social normativity.

Programme structure

The programme consists of:

- a core curriculum (60 credits), comprising:
 - a thesis and a thesis seminar;
 - core subjects (30 credits);
- a specialization (30 credits);
- and optional courses (30 credits).

For a programme-type, and regardless of the focus, options/or elective courses selected, this master will carry a minimum of 120 credits divided over two annual units, corresponding to 60 credits each.

LIST OF FOCUSES

Students will choose one professional focus from the following:

Students must choose one professional focus from :

- > Professional focus : Public Ethics and Policies [en-prog-2018-ethi2m-lethi200s]
- > Professional focus : Sciences and Techniques [en-prog-2018-ethi2m-lethi201s]
- > Professional focus : Biomedical Ethics and Bioethics [en-prog-2018-ethi2m-lethi202s]
- > Professional focus : Ethics, Norms and Societies [en-prog-2018-ethi2m-lethi203s]

PROFESSIONAL FOCUS : PUBLIC ETHICS AND POLICIES [30.0]

The "Public Ethics and Policies" focus is designed to train students to analyse the ethical stakes involved in the design and implementation of public policies. This analysis relates both to the formal conditions which should govern democratic procedures in political decision making and the principles of justice which dictate policy methods and outcomes in different areas of social life. This analysis will require students to demonstrate - knowledge of the concepts and methods from economic and social ethics as well as political philosophy, - the ability to use these concepts and methods in a particular field relating to the implementation of public policies and - the ability to understand empirical analyses of policies, their field of application and the ways in which they are designed and implemented.

PROFESSIONAL FOCUS : SCIENCES AND TECHNIQUES [30.0]

The "Ethics in science and technology" focus is designed to train students to analyse the ethical and societal issues raised by scientific developments and technological innovations. Students will be able to make use of the basic concepts of the philosophy of science, the sociology of science and of ethical analyses in order to put into critical perspective the impact of science and technology on the evolution of societies. The first term of the second year of the Master's degree will be spent at a university in the ESST "Society, Science and Technology" network with which UCL has entered into a specific exchange programme, such as the University of Strasbourg, Maastricht University or the University of Oslo. For further information, visit the website of the ESST network or contact the International Coordinator at the School of Philosophy, Professor Peter Verdée, or UCL's ESST programme coordinator, Professor Alexandre Guay.

PROFESSIONAL FOCUS : BIOMEDICAL ETHICS AND BIOETHICS [30.0]

The professional focus in biomedical and bioethical ethics is designed to train students to develop a critical analysis of situations and problems associated with current medical practice, both in developed and developing countries. Such analysis will not only take account of the objective facts of the situation and the system of regulation which relates to decisions, but also ideological, cultural and historical data. This analysis is designed to help students acquire - understanding of the theories, concepts and methods in current biomedical ethics, - the ability to make use of these models and methods to describe situations and suggest a well-balanced set of solutions to the problems faced, - personal familiarity of the environments where such questions arise (laboratories, care institutions, etc.).

o Public Health (5 credits)

Students must choose a course (5 credits) in the Master in Public Health (<https://uclouvain.be/en-prog-esp2m>).

PROFESSIONAL FOCUS : ETHICS, NORMS AND SOCIETIES [30.0]

The Ethics, Norms and Societies focus is designed to train students to analyse the ethical stakes which are present in normative régimes (positive discrimination public policies on basic rights, the role of human rights and gender policies). Students will learn how to make use of perspectives from other fields where norms are established and to take account of factors highlighted by particular disciplinary tools (law theory, anthropology, sociology and social psychology). The main objective of this professional focus is therefore to train students to appreciate the conditions in which norms work most effectively in concrete contexts of application in the new regulatory frameworks.

Course prerequisites

A document entitled (nb: [not available](#) for this programme ethi2m) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document *"In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"*

ETHI2M - Information

Admission

General (<https://uclouvain.be/en/study/inscriptions/admission-requirements-master-s-degree.html>) and specific admission requirements for this program must be satisfied at the time of enrolling at the university.

SUMMARY

- > [Specific Admission Requirements](#)
- > [University Bachelors](#)
- > [Non university Bachelors](#)
- > [Holders of a 2nd cycle University degree](#)
- > [Holders of a non-University 2nd cycle degree](#)
- > [Adults taking up their university training](#)
- > [Access on the file](#)
- > [Admission and Enrolment Procedures for general registration](#)

Specific Admission Requirements

Specific Admission Requirements

1. Student must hold a first level university degree.

2. Provide proof of a sufficient level in French ([B1 of the European Framework of Reference](#) )

3. Students must have previously studied and developed skills in:

- the scientific written and oral practices of the French language;
- the following disciplines of philosophy: logic, moral philosophy, epistemology, anthropology, metaphysics, social philosophy and aesthetics;
- the history of philosophy;
- reading and commenting on a major philosophical text;

at the end of an undergraduate programme, including at least the 60 specific credits listed below:

- An introduction to philosophy (5 credits);
- Moral philosophy (6 credits);
- Epistemology (10 credits);
- Logic (5 credits);
- Metaphysics (5 credits);
- Anthropology (5 credits);
- Notions of aesthetics and art philosophy (3 credits);
- Social and political philosophy (4 credits)
- History of philosophy (6 credits)
- Analysis of philosophical texts (6 credits)
- Introduction to scientific writing (5 credits)

The 30 credits of the [Minor in Philosophy \[30.0\]](#) (<https://uclouvain.be/xprog-2018-min-lfilo100i>) satisfy these requirements.

Courses not taken will be added to the Master's programme (without exceeding a total of 15 credits).

If the total number of prerequisites exceeds 15 credits, admission to the Master's programme is subject to successful completion of the [Master's in Ethics preparatory year \[60.0\]](#) (<https://uclouvain.be/xprog-2018-ethi1pm>), for which the programme is tailored to the student's academic record.

Course equivalences must be approved by the Chair of the Examination Board, the Examination Board Secretary and the Vice Dean.

University Bachelors

Diploma	Special Requirements	Access	Remarks
UCLouvain Bachelors			
Bachelor in Philosophy		Direct Access	
All bachelor	If student has taken : - la Minor in Philosophy	Access with additional training	With prerequisites integrated into the masters programme (max. 15 credits)

Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
"Licenciés"			
Holder of a "Licence" in philosophy		Direct Access	
Masters			
Master [60] in Philosophy Master [120] in Philosophy		Direct Access	An exemption of a maximum volume of 60 credits can be granted

Holders of a non-University 2nd cycle degree

Adults taking up their university training

> See the website [Valorisation des acquis de l'expérience](https://uclouvain.be/fr/etudier/vae) (https://uclouvain.be/fr/etudier/vae)

It is possible to gain admission to all masters courses via the validation of professional experience procedure.

Access on the file

Reminder : all Masters (apart from Advanced Masters) are also accessible on file.

Admission and Enrolment Procedures for general registration

Requests for additional information regarding admission should be addressed to Mme Fiorella Flamini, Study Adviser at the **Faculty of Philosophy, Arts and Letters** (conseiller.etudes-fial@uclouvain.be, tel. : +32 (0)10 47 48 57). All requests for admission based on the student's academic record (as well as category II and III bridging programmes) should be submitted to Mme Fiorella Flamini, Study Adviser at the **Faculty of Philosophy, Arts and Letters** (Collège Mercier, 14 bte L3.06.01, Place Cardinal Mercier B-1348 Louvain-la-Neuve, conseiller.etudes-fial@uclouvain.be, tel. : +32 (0)10 47 48 57). The application file should include a letter in support of the application, academic transcripts for every year in higher education, a copy of the qualification(s) gained and, where the student has had a professional career, a curriculum vitae. International candidates should submit their request to the University Enrolment Office according to the procedure outlined at : <https://uclouvain.be/inscription> (https://uclouvain.be/inscription)

Supplementary classes

To enrol for this Masters, the student must have a good command of certain subjects. If this is not the case, they must add preparatory modules to their Master's programme.

- Mandatory
 Courses not taught during 2018-2019
 Periodic courses taught during 2018-2019
- Optional
 Periodic courses not taught during 2018-2019
 Activity with requisites

Teaching method

The courses on the programme of the master en éthique guarantee students lessons in ethical reflection in one of the four specialised fields corresponding to the four focuses and train the students in how to acquire the necessary scientific skills for ethical reflection in a specific field. As for the research seminars, they are the place "par excellence" where the student learns how to integrate research work into an academic debate on ethics. Given that UCL is a complete university which is very up-to-date in ethical research, the students are easily integrated into the activities of the various ethical research bodies in UCL: Centre de philosophie du droit (CPDR), Unité d'éthique biomédicale (EBIM), Chaire Hoover d'éthique économique et sociale (ETES), Centre interdisciplinaire techniques, sciences et sociétés (CITES). Incidentally, internationalisation is not forgotten, as students can take part of their training away from UCL, either by sharing courses with KULeuven, or through a stay at a foreign university. Finally, the programme ends with the writing and oral defence of an individual piece of research.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

In the courses and all the more so in the seminars on the master en éthique, students are often evaluated on their individual work. The relatively small class sizes means that teachers can provide follow-up guidance and constructive criticism.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits

Mobility and/or Internationalisation outlook

Students can stay abroad for one semester as part of the [Erasmus](https://uclouvain.be/en-10945.html) exchange. They must choose the ethics and practical philosophy courses for 30 credits.

The focus "Ethics in Sciences and Techniques" (EST) foresees an exchange of 30 credits in the first term of the second block of the master abroad in one of the following two universities: Strasbourg or Lund University.

The focus "Public Ethics and Policies" (EPP) foresees joint courses and seminars (in English) with the orientation "Ethique et philosophie sociale et politique" from the master en philosophie organised by KULeuven ([Hooger Instituut voor Wijsbegeerte](https://www.hoogerinstituut.be/))

The Ecole de philosophie has privileged links, in teaching and research, with the Département de philosophie and the Centre de recherche en éthique (University of Montréal). A Mercator exchanges agreement exists with the University of Montréal.

Numerous partnerships with the Faculty of Philosophy, Arts and Letters (FIAL): see <https://uclouvain.be/fr/facultes/fial/partenaires.html>

Practical information for arriving FIAL students : <https://uclouvain.be/en-280048.html> (<https://uclouvain.be/en-280048.html>)

For more information : erasmus-in-fial@uclouvain.be

Practical information for departing FIAL students : <https://uclouvain.be/fr/facultes/fial/etudiant-fial-en-echange.html> (<https://uclouvain.be/fr/facultes/fial/etudiant-fial-en-echange.html>)

Possible trainings at the end of the programme

Other accessible masters :

At the end of the master 120, each focus in the Master in ethics can be obtained in a new program of 30 credits only.

Teacher Training Certificate (upper secondary education):

This programme does not offer a teaching focus and does not lead to a Teacher Training Certificate (upper secondary education) (AESS). To obtain a teacher training degree (titre requis to become a fully qualified teacher), students with a Master's in Ethics will have to undertake additional training: the extra year's study, part of the Master's in Philosophy, will include a thesis and a thesis seminar (30 credits), the teaching focus (30 credits) and possibly other additional modules (30 credits maximum). However, students combining a Master's in Ethics with the [Teacher Training Certificate for upper secondary education programme \(Philosophy\) \[30.0\]](https://uclouvain.be/xprog-2018-filo2a) (<https://uclouvain.be/xprog-2018-filo2a>) will be partly qualified (titre suffisant) but not fully qualified (titre requis). For further information about full qualifications (*titres requis*) and partial qualifications (*titres suffisants*): http://www.segec.be/Documents/Fesec/Administration/Brochure_titres_mars___FESeC.pdf

Accessible doctoral training :

- École doctorale in philosophy;

Certificates

The masters programme involves in particular programmes for both university certificates ("certificat universitaire en éthique biomédicale" and "certificat universitaire en éthique économique et sociale"). On file, some of the activities taken as part of the certificates can be credited in the masters programme.
