COURSE PREREQUISITES

A document entitled (nb: [not available](#) for this programme lori100i) specifies the activities (course units - CU) with one or more prerequisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document *"In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"*

Admission

Specific Admission Requirements

The program is intended for all baccalaureate students, regardless of their main course of study. There are no entry requirements or admission conditions.

Teaching method

The courses make use of a variety of teaching techniques and strategies (lectures, group work, individual work, seminars, reading etc.) which help students to acquire the necessary skills. Certain courses also use e-learning techniques (provision of resources and exercises, teaching devices, collective sharing and assessment of work).

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

According to the type of course, there are different forms of assessment. Certain courses have traditional oral and/or written assessments (which take place in the examination periods in January, June and August/September), while seminars involve student participation throughout the semester and the assessment of individual work. Further details on the assessment method are given at the beginning of each course.

Course examinations on communication skills are designed to test performance, that is to say practical use of the language in meaningful situations, which demonstrate students' level of ability.

Teaching activities are assessed in accordance with the rules currently in force at the University (see [General Examination Regulations](https://uclouvain.be/en-enseignement-reglements.html) (<https://uclouvain.be/en-enseignement-reglements.html>)). Students may also find additional information on the particular methods of assessment in the course descriptions.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.
