Detailed programme

PROGRAMME BY SUBJECT

- Mandatory
- △ Courses not taught during 2020-2021
- ⊕ Periodic courses taught during 2020-2021
- ⊗ Optional
- ⊖ Periodic courses not taught during 2020-2021
- Activity with requisites

COURSE PREREQUISITES

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "*In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?*"

MININFO - Information

Access Requirements

Specific access requirements

This polytechnic minor is chiefly intended for students enrolled in a bachelor in engineering sciences (civil engineering). All students taking a bachelor in engineering science (civil engineering) thus has access to this minor, except for those students who have already chosen computer science as a major.

Students enrolled in a bachelor in engineering sciences (architectural civil engineering or bioengineering) as well as other bachelor programmes (science, economic science and business studies or pharmacy science) may get access to the non-engineering minor in computing science. Admission to that minor requires submitting a formal application.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Possible trainings at the end of the programme

Majors-minors leading directly to a master's course(s) :

For students who have performed well and obtained a bachelor's qualification in engineering sciences - civil engineering, the polytechnic minors guarantee them, as part of a programme which includes one of these minors, unconditional access, without additional training, to the civil engineering master's which corresponds to this minor.

- For the minor in computer science: the master in computer science engineering
