ANAP2MC - Introduction

Introduction

ANAP2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to be recognised holders of the special professional title of Specialist Doctor in Pathological Anatomy. (Ministerial Decree of 26.04.198, published on the 01.07.1982).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, and is divided up into two years of foundation studies including specific university courses, followed by three years of extended studies. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These apprenticeships include being on call.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

ANAP2MC - Information

Access Requirements

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.
Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.
The admission requirements must be met prior to enrolment in the University.*

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- [General access requirements](#)
- [Specific access requirements](#)

General access requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific access requirements

Specific Admission Requirements

- Applicants must be university graduates in medicine or doctors from another member country of the European Union authorising medical practice in Belgium.
- Applicants must possess a document attesting that, at the end of the selection process, they were selected as specialist candidates in Pathological Anatomy in a Belgian faculty of medicine.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of 30.05.2002, relating to the planning of the medical offer for the public, published on 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Pathological Anatomy (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission applications must be addressed to the academic secretary. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Exams at the end of the first and second parts of the programme, aimed at evaluating the candidate's abilities in the domains of morphological analysis and diagnostic conclusions.

Further to the application of the Royal Decree of 16th March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training programme. The exam focuses on autopsy pathologies and surgical pathology. The cases selected for the exam are presented by the candidate during one of the service seminars.

The exam for the 2nd part focuses on the analysis of pathological cases from various sectors, as well as the writing of a thesis on a subject linked to pathological anatomy. The evaluations are carried out by the ensemble of the pathologists from the sectors concerned who have participated in the training programme.

Upon successful fulfillment of all the above-described training requirements, the teaching committee will duly award the academic title in Pathological Anatomy.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific programme in the context of specialised training leading to validation.
