COMU2M1 - Introduction

Introduction

COMU2M1 - Teaching profile

Learning outcomes

The 60 credit Master in Information and Communication provides a special kind of training which is in demand at the professional level. In parallel with the requirement for specialists in information and communication, there is also a clear need for people with qualifications in other subject areas but with information and communication training. This programme is therefore designed to introduce students to the theories and methods of information and communication sciences and to help them to acquire special skills whilst also building on their previous experience.

To this end there are four options : Media, Culture and Education, Public Relations and Communication in Organizations, the Louvain School of Journalism and Multimedia.

This programme is open to holders of any 120 credit Master (apart from the Master in Information and Communication) or of any degree (except Information and Communication) from a Belgian university who wish to build on what they have already studied.

It is also open to students who are Bachelors in Information and Communication.

Programme structure

The 60 credit Master programme in Information and Communication is made up of 60 credits, as follows:

- core subjects comprising a dissertation and three subjects (30 to 40 credits)
- one or two options (20 to 30 credits)

The dissertation which each student must produce and defend forms part of the core subjects and differs, both in terms of the workload and number of credits, according to what each student has chosen to do.

Students who have already produced a final piece of work in a second cycle course (e.g. Master, degree etc) may replace the 25 credits of the core subjects for the dissertation with a dissertation or a report on a work placement worth 15 credits.

This group of students, exceptionally, may choose two options instead of one.

- Students who have already gained a Bachelor degree in Information and Communication must follow the foundation element of the core subjects (15 credits, three optional subjects) which may be studied in greater depth by selecting one of the four options on offer (15 credits each) and one optional subject. Students must produce and defend a dissertation.
- Students who have already gained a Master and a Bachelor degree with Information and Communication as a subsidiary subject must also follow the foundation element of common subjects (15 credits or three optional subjects) which may be studied in greater depth by selecting a foundation option of 15 credits and an additional option, also worth 15 credits. Students must produce and defend a dissertation or a report on a work placement.
- Students who have already gained a Master and a Bachelor degree without Information and Communication as a subsidiary subject must follow the prerequisite subjects in the relevant foundation option and a course of study identical to that outlined above. Students must produce and defend a dissertation or a report on a work placement.

COMU2M1 Programme

Detailed programme by subject

CORE COURSES

- Mandatory
- ⊗ Optional
- △ Not offered in 2022-2023
- ⊙ Not offered in 2022-2023 but offered the following year
- ⊕ Offered in 2022-2023 but not the following year
- △ ⊕ Not offered in 2022-2023 or the following year
- Activity with requisites
- 🌐 Open to incoming exchange students
- 🌐 Not open to incoming exchange students

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

COMU2M1 - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

Specific access requirements

L'admission à ce diplôme est réglée conformément au décret du 31 mars 2004 définissant l'enseignement supérieur, favorisant son intégration dans l'espace européen de l'enseignement supérieur et finançant les universités.

En plus de remplir les conditions d'accès décrites ci-dessous, les candidats devront apporter la preuve d'une maîtrise suffisante de la langue française (niveau B1 du [Cadre européen commun de référence](#)).

Conditions générales d'accès

Conformément aux [conditions d'admission générales](#), ont un accès direct les titulaires porteurs d'un des grades académiques de la Communauté française de Belgique suivants :

- un grade académique de premier cycle du même cursus;
- un diplôme universitaire de premier cycle reconnu comme comprenant les 108 crédits suivants :

Economie et gestion (9 crédits)

Droit (9 crédits)

Informatique et Méthode (18 crédits)

Autres sciences humaines (30 crédits)

Information et communication (27 crédits)

Langues (15 crédits)

Les titulaires d'un diplôme universitaire de premier cycle reconnu comme comprenant au moins 93 crédits de ce programme type peuvent avoir accès à ce master en acquérant le solde des crédits manquant en prérequis.

Être titulaire d'un diplôme universitaire de second cycle (moyennant généralement un cours prérequis).

University Bachelors

Diploma	Special Requirements	Access	Remarks
UCLouvain Bachelors			
Bachelor in Information and Communication		Direct access	
Bachelier en information et communication		Direct access	
Bachelier en sciences économiques et de gestion Bachelier en sciences humaines et sociales Bachelier en sciences politiques	avec mineure en Information et communication	Access with additional training	In some cases, the UCLouvain Enrolment Office, after reviewing your online enrolment or re-enrolment application, will ask you to provide an enrolment authorisation from your faculty/school.

Bachelier en sociologie et anthropologie			
Bachelier en droit	avec mineure en Information et communication	Access with additional training	In some cases, the UCLouvain Enrolment Office, after reviewing your online enrolment or re-enrolment application, will ask you to provide an enrolment authorisation from your faculty/ school. Cours prérequis : COPS1114 Statistique et éléments de probabilité (partim) [30,30] (5 crédits)
		Direct access	
Bachelier en histoire Bachelier en langues et littératures françaises et romanes Bachelier en langues et littératures modernes	avec mineure en Information et communication	Access with additional training	In some cases, the UCLouvain Enrolment Office, after reviewing your online enrolment or re-enrolment application, will ask you to provide an enrolment authorisation from your faculty/ school. Cours prérequis : COPS1114 Statistique et éléments de probabilité [30,30] (5 crédits) COPS1115 Economie politique (partim) [45,15] (5 crédits)
Aute bachelier	Programme répondant aux conditions générales d'accès	Access based on application	
	Programme ne répondant pas aux conditions générales d'accès	Access based on application	Accès au maste moyennant réussite d'une année préparatoire

Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
"Licenciés"			
Licence en Information et communication		Access with additional training	
Autre licence		Access with additional training	Un cours pré requis
Masters			
Tout master	Avec mineure en Information et communication	Access based on application	
Autre master		Access with additional training	Un cours pré requis

Holders of a non-University 2nd cycle degree

Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum of 60 ECTS credits, or refused.

Admission and Enrolment Procedures for general registration

Teaching method

The 60 credit Master is mainly intended for those who have already gained a second cycle degree. For this reason, the teaching strategy is relevant and innovative. Students have the opportunity of doing many different kinds of learning activities, both individually and in groups. These activities are assessed on a continuous and regular basis.

Many subjects are tackled in an integrated way, often reflected in a joint timetable which enables students to gain a variety of different insights and additional perspectives from a single starting point. The teaching methods on this programme are active, even demanding for students, but they are specially tailored for those who have already demonstrated high level intellectual ability.

Methods which reflect interdisciplinarity

Information and communication sciences lend themselves naturally to interdisciplinarity. The very different backgrounds of the teaching staff both reflect and guarantee this. Moreover the way students are selected for this 60 credit Master shows the importance of interdisciplinarity. Various activities bring out the different backgrounds of students. Not only do students with an arts, human sciences or exact sciences background come together for both theoretical and practical work, but they are also encouraged to bring their own knowledge and questions into the field of communication.

Variety of teaching strategies (including e-learning) :

Depending on the subject matter, the teaching is designed to help students acquire knowledge and analytical skills. The aim is always to help students learn to develop independent intellectual and practical skills which will be particularly useful when doing projects and other pieces of work, either individually or in groups. The use of intelligent technology is one of the key components: students are introduced to technology and software relevant to their area and encouraged to use them throughout the programme.

Some teaching sessions or parts of courses make use of the different possibilities offered by iCampus and other similar intranet sites.

Variety of learning situations :

Students will take part in traditional forms of learning : ex cathedra courses, seminars and workshops, working both individually and in groups. They will undergo continuous assessment and, at certain times, there will be examinations. Students may also produce a dissertation or a work placement report. Finally, many courses involve e-learning (resources and exercises, class management, distribution and collective assessment of work).

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Written and oral examinations test how much students have learned and whether they have mastered concepts, theories, basic facts and expertise in the different disciplines.

There is continuous assessment of exercises. Multimedia tools also create learning opportunities, some of which are in the form of distance learning which regularly includes self-assessment techniques.

Mobility and/or Internationalisation outlook

In contrast to the 120 credit Master, the 60 credit Master does not offer joint courses with other institutions.

As one of the most original programmes in Europe, this Master provides a good opportunity for foreign students wishing to do preliminary training.

Possible trainings at the end of the programme

Holders of the 60 credit Master in Information and Communication may enter the Teaching Social Science in Higher Education programme (diplôme d'agrégé de l'enseignement supérieur en sciences sociales)
