## **ESP2M - Introduction**

### **Introduction**

---

## ESP2M - Teaching profile

### Learning outcomes

The 120 credit programme of the Master in Public Health (ESP120) is designed for students from very different backgrounds, many of whom will already have professional experience. This Master provides a second cycle training programme, the aim of which is to enable its graduates to take up a management post (executive, assessor, expert, manager) in the different areas of public health. Public health aims to improve and prolong life through collective action to combat disease, promote a healthy environment and organize high quality medical, nursing and paramedical services accessible to all.

#### Course objectives

The **research focus** in public health prepares students for research in public health. Since public health is defined more by its objectives than by a theoretical framework, research in public health relates to knowledge which aims to reduce illness and maintain and promote health in the general population. The planning of studies, the collection and analysis of data and health policies and programmes are the foundation of the programme. Depending on their objectives and previous experience, students may choose to do more advanced training in epidemiology and clinical research or in health policies and systems. These two possibilities are not mutually exclusive.

The programme is also designed as much for recent bachelors or holders of a Master's degree as for health professionals who wish to improve their analytical skills. It aims to train researchers who are able to respond to health issues in Belgium or elsewhere. Participation by students from developing countries is particularly encouraged.

Although the research focus of the Master in Public Health gives direct access to the doctoral programme for qualified researchers, this degree can also lead on to employment ; graduated may supervise research on health carried out by governments, non-government organizations (NGOs), care institutions or private companies.

The **professional focus** enables students to gain university level skills combining techniques and skills for questioning, based on interdisciplinarity, scientific rigour and the results of research in the areas of management of care institutions, health promotion and patient education, community health programmes or nursing. In particular, graduates will :

- demonstrate their ability to take the initiative and take responsibility in the professional situations they have to deal with ;
- have developed practical intelligence in situations which is based on knowledge that can be transferred to new situations. In other words to know how to learn and to transpose knowledge;
- be able to mobilize a network of players in similar situations, to encourage them to share challenges and take on joint responsibilities ;
- be able to become committed and involved.

The **option courses** for the **professional focus** are :

#### Management of care institutions

The programme is designed for students who wish to acquire and/or improve their skills in the field of management of care institutions such as hospitals, convalescent homes and care homes. These skills include :

- conforming with legal and administrative requirements,
- understanding logistical or technical problems,
- leading teams,
- management : being able to devise, plan, organize and assess resources, means and processes and interventions,
- project management,
- information and communication with people and the institution in order to promote good, ethical management practice.

Graduates of this programme will have acquired, in these fields, university-level skills combining techniques and skills for questioning, based on interdisciplinarity, scientific rigour and the results of research.

#### Health and patient education

This Master is designed for professionals in the fields of health, medico-social work and education who wish to acquire and/or develop university-level skills to devise, plan, coordinate, manage and/or assess action in the field of health and patient education. .

Graduates of this programme will have acquired, in these fields, university-level skills combining techniques and skills for questioning, based on interdisciplinarity, scientific rigour and the results of research.

#### Community health policies and programmes

By the end of the programme, students will be able to

1. make a community diagnosis, that is to say identify the priority medico-social problems of a community or a target group, as well as the health factors which influence them,
2. devise, plan, implement and assess community health programmes relevant to the problems selected, by enlisting community participation,
3. organize information and communicate it throughout with the different players (political authorities, target group, general population, professionals, managers of community health and other institutions such as hospitals and schools),
4. take responsibility for coordinating health programmes within a structure or a region, manage the staff, technical and financial resources to ensure that they are long-lasting.

#### Clinical nursing

This option course is designed to train health professionals able to take on leadership in care and nursing services and to contribute to the development of knowledge and practice in nursing. These professionals will play a key role in the improvement of care and health services, in the training of nurses and in the administration of nursing services in a variety of settings.

By the end of the programme, students will be have developed skills enabling them to

- analyze complex clinical situations in situations both in and outside hospital.
- take decisions adapted to the special situation of the patient, whilst taking the priorities into consideration.
- establish a relationship of trust, partnership and help with the patient and his close family.
- initiate and encourage the updating of innovative practices in nursing.
- draw up and update procedures and protocols and adapt them to the care situation.
- make use of all the dimensions of the health system in the care situation.
- direct patients to suitable services and make sure they are monitored.
- assess the information and training needs (patients, close relations, team), respond and share knowledge with other health professionals.
- play the role of a consultant : to lead discussions and guidance activities.
- develop better self-understanding with a view to managing stress and resisting pressure.
- develop assertive behaviour patterns with a view to collaborating with the team and all the internal and external structures.

On successful completion of this programme, each student is able to :

exploiter de manière active et intégrée un corpus de savoirs pluridisciplinaires (connaissances, méthodes, modèles, cadres conceptuels) indispensables pour agir dans les différents domaines de la Santé Publique.

1.1 Démontrer une compréhension des concepts suivants, autant aux niveaux individuel que collectif et dans leurs interactions:

- état de santé,
- inégalités en matière de santé,
- déterminants de la santé et de la maladie,
- stratégies de promotion de la santé : prévention, protection, communication et éducation,
- système et services de santé (organisation, financement, utilisation).

1.2 Démontrer une compréhension des structures, du financement et de l'organisation de la santé publique et des services de santé/soins à l'échelle locale, nationale et supranationale.

1.3 Appliquer dans sa pratique les sciences de la santé publique : épidémiologie, sciences humaines (économie, sociologie, psychologie,...), biostatistique

1.4 S'appuyer, dans sa pratique, sur des données et des résultats fiables de recherches (evidence-based practice)

L'étudiant démontrera également des savoirs et des capacités de mise en œuvre hautement spécialisés dans un ou deux domaines de la santé publique (cours au choix, options, ...), en fonction de son projet professionnel.

récolter et d'analyser de manière critique l'information sur les situations de santé à l'échelle individuelle, collective, sur les organisations ou les systèmes de santé (données, faits, concepts, théories, etc.), en reconnaissant explicitement les valeurs sur lesquelles repose son analyse.

2.1 Reconnaître l'existence d'un enjeu ou d'un problème en matière de santé publique, dans ses dimensions systémiques (interactions entre l'individu, le groupe, l'organisation, le système, l'environnement)

2.2 Identifier les sources d'information fiables et appropriées, y compris celles provenant des milieux communautaires et, le cas échéant, s'adapter à la diversité des données par des méthodes adéquates (modélisation, etc.).

2.3 Interpréter l'information en considérant le contexte éthique, politique, scientifique, socioculturel et économique.

2.4 Recommander des actions spécifiques au terme de l'analyse des données.

acquérir de nouveaux savoirs et de développer de nouvelles compétences afin de pouvoir s'adapter à des contextes changeants ou incertains et y évoluer positivement.

3.1. Elaborer et utiliser des stratégies personnelles et collectives pour s'adapter à un environnement changeant ou incertain

3.2. Démontrer les habiletés requises pour identifier des occasions de formation continue dans le champ de la santé publique.

3.3. Evaluer ses pratiques et celles de collaborateurs pour contribuer à l'amélioration des acquis et pratiques.

utiliser à bon escient, pour communiquer des informations en santé la communication écrite, verbale et non verbale, l'écoute, les technologies de l'information et de la communication (TIC), et la pédagogie.

Il sera notamment capable de transmettre une information adéquate et correcte sur des thématiques sujettes à l'incertitude (par exemple, dans le cas de gestion d'épidémie, de planification d'intervention en santé publique, etc.).

4.1 Adapter l'information aux différents publics (patients, population, groupes, professionnels, etc).

4.2 Mobiliser les individus et les collectivités en utilisant les médias appropriés et les ressources communautaires.

4.3 Utiliser les technologies modernes pour communiquer efficacement.

4.4. Rédiger de manière claire et rigoureuse des résultats d'analyse et de recherche. Sous forme de rapports, de document de projet, etc

intégrer dans ses pratiques les dimensions de diversité et de pluralité des individus et des groupes.

5.1 Reconnaître la façon dont les déterminants de la santé (biologiques, psychologiques et psychosociaux, sociaux, culturels, économiques et physiques) influencent la santé et le bien-être de divers groupes.

5.2 Tenir compte de la diversité de la population, publics cibles et acteurs de santé dans la planification, la mise en œuvre, la gestion, l'adaptation et l'évaluation des interventions et des programmes.

influencer et de mobiliser les partenaires (individus, groupes, institutions) dans l'atteinte d'un but commun, soit l'amélioration de la santé et du bien-être des groupes et des individus.

6.1 Identifier les partenaires pouvant contribuer à la résolution des problèmes de santé publique et collaborer avec eux.

6.2 Utiliser/développer des habiletés de mobilisation, négociation, gestion de conflits et d'animation de groupes.

6.3 Concilier/négocier les divers intérêts visant l'amélioration de la santé et du bien-être

6.4. Argumenter, écrire ou agir en faveur d'une cause, d'une politique ou d'un groupe de personnes pour réduire les inégalités de santé, favoriser l'accès aux services de santé et promouvoir l'utilisation efficiente des ressources.

identifier des actions ou des projets pour aider des personnes ou des groupes à faire des choix en santé et agir sur leur mode de vie et leur environnement.

7.1 Amener les personnes, dans le cadre d'une relation interpersonnelle ou dans un cadre collectif.

7.2 Développer des compétences réflexives et auto-régulatrices en lien avec des problématiques de santé personnelles ou collectives.

7.3 Engager des actions pouvant contribuer à la préservation ou l'amélioration de leur santé, et accompagner leur démarche, notamment en soutenant la motivation à des actions positives.

intervenir efficacement et de résoudre des problèmes complexes dans le domaine de la Santé Publique.

Pour cela l'étudiant sera capable de participer activement

8.1 A la description des implications des choix opérés en matière d'intervention, en particulier ceux s'adressant aux déterminants de la santé, y inclus les déterminants économiques, et à la recommandation ou au choix d'une piste d'action.

8.2 A l'élaboration un plan de mise en œuvre tenant compte des contraintes du contexte, notamment sociales, économiques, légales et éthiques.

8.3 A la mise en œuvre adaptive du plan, en gérant le risque et l'incertitude inhérents au contexte réel (économiques, social, légal, éthique).

8.4. Au management au financement et à la gestion des programmes de santé, de développement des institutions ou des systèmes de soins de santé

8.5 A l'évaluation des interventions et des programmes (efficacité, équité, efficience, impact).

inscrire son action dans un cadre institutionnel à la fois porté et contraint par les objectifs des organisations et des parties prenantes, et dans un contexte politique et économique donné.

Il aura développé des habiletés de leadership qui favorisent le développement des compétences, améliorent l'efficience et le bien-être du et dans le milieu de travail.

9.1 Contribuer au développement d'une vision commune et de valeurs essentielles pour la planification et la mise en œuvre de politiques de santé et de démarches de soins dans les collectivités

9.2. Situer son action dans une démarche stratégique

8.3 Mobiliser les personnes, les équipes, l'information et les ressources, en interdisciplinarité et en tenant compte des principes éthiques de la santé publique

9.4 Démontrer une habileté à renforcer les capacités communautaires et/ou institutionnelles par le partage des savoirs et du pouvoir.

9.5 Faire évoluer une situation, une communauté ou une organisation par des solutions innovantes et appropriées, tenant compte du contexte

## Programme structure

---

The Master comprises :

- core subjects : 36 credits for courses and 24 credits for the dissertation, including the preparatory seminar

- two focuses :

\* a research focus of 30 credits

\* a professional focus of 30 credits

- option courses : for the research focus, students may either choose the two option courses for 15 credits each, or one option course for 15 credits and optional subjects from the optional subjects list to gain 30 credits ; for the professional focus, students may choose one of the four suggested option courses : Management of care institutions ; Health and patient education; Community health policies or Clinical nursing.

The option courses in Epidemiology and clinical research and Research on health services are recommended for students who choose the research focus.

The option courses in Management of care institutions, Health and patient education and Clinical nursing are recommended for students who choose the professional focus.

There is no teaching focus.

Wathever the focus or the options chosen, the programme of this master shall totalise 120 credits, spread over two years of studies each of 60 credits

## Course prerequisites

---

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified **in the detailed programme**: their title is followed by a yellow square.

### Prerequisites and student's annual programme

As the prerequisite is for CU registration purposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.

For more information, please consult the [Academic Regulations and Procedures](https://uclouvain.be/fr/decouvrir/rgee.html) (<https://uclouvain.be/fr/decouvrir/rgee.html>).

### # Prerequisites list

<b>WESP2123</b>	"Principes des essais cliniques" has prerequisite(s) WFSP2104 <ul style="list-style-type: none"> <li>• WFSP2104 - Statistics in health sciences (introduction)</li> </ul>

## The programme's courses and learning outcomes

---

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

## ESP2M - Information

### Access Requirements

*Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.*

*General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.*

*Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.*

***In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.***

#### SUMMARY

- > General access requirements
- > Specific access requirements
- > University Bachelors
- > Non university Bachelors
- > Holders of a 2nd cycle University degree
- > Holders of a non-University 2nd cycle degree
- > Access based on validation of professional experience
- > Access based on application
- > Admission and Enrolment Procedures for general registration

### Specific access requirements

Accès personnalisé : le master peut également être accessible sur examen de dossier et notamment par validation des acquis de l'expérience ([www.uclouvain/VAE](http://www.uclouvain/VAE))

Procédures particulières (éventuelles) : ce master ouvre le droit aux « congé d'éducation » payés.

#### University Bachelors

Diploma	Special Requirements	Access	Remarks
<b>UCLouvain Bachelors</b>			
Tous les bacheliers	Pré-requis qui, s'ils dépassent 15 crédits, sont intégrés dans l'Année préparatoire	Access with additional training	Des cours de l'Année préparatoire (=épreuve préparatoire?) en fonction d'une part du programme de baccalauréat suivi et d'autre part de l'option du master choisie.
<b>Others Bachelors of the French speaking Community of Belgium</b>

## Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
<b>"Licenciés"</b>			
<b>Masters</b>			
Tous les masters		Access based on application	En fonction d'une part du cursus réalisé et d'autre part de la finalité et de l'option choisie, des dispenses peuvent être obtenues via la VAE-D.
		Access based on application	

## Holders of a non-University 2nd cycle degree

Des compléments de formation pourront être exigés qui s'ils ne dépassent pas 15 crédits peuvent être intégrés au programme du 1er master.

### Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

Les adultes avec une expérience professionnelle pourront s'inscrire au programme sur base d'une procédure d'admission individualisée.

### Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum of 60 ECTS credits, or refused.

### Admission and Enrolment Procedures for general registration

Accès personnalisé : le master peut également être accessible sur examen de dossier et notamment par validation des acquis de l'expérience ([www.uclouvain/VAE](http://www.uclouvain/VAE))

Procédures particulières (éventuelles) : ce master ouvre le droit aux « congé – éducation » payés.

## Teaching method

The programme for the Master in Public Health is designed to create the best possible conditions for the acquisition and development of professional skills for future executives in the field of health.

To this end, the following elements are key :

- learning activities centred on the **practical reality of public health** : analysis of problems, case studies, participation of professional expert, in small groups of students according to the option courses chosen
- the **connection between theory/practice** a vital component of the programme, reflected in many combined activities and teaching in subject blocks
- the possibility of adjusting the basic programme to take the **professional training project** into account. This project can also form the common theme of different assignments and form the subject of the dissertation.
- a lively exchange of ideas and debate are also encouraged in group work, sessions for exchange of techniques and integrated activities in small groups. This also encourages openness to **interdisciplinarity**.
- **acquisition of cross-disciplinary skills (analysis, argumentation, summary, transfer)** is also encouraged by an assessment approach which gives greater weight to the integrated use of knowledge than its reproduction.
- teaching is done by a team of academic staff and health experts.

There will be special use of e-learning techniques to help group work.

## Evaluation

***The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".***

Special attention is paid to assessing skills, that it to say assessment of projects, performance in real situations and work related to students' professional project.

Assessment will give greater weight to the integrated use of knowledge than its reproduction.

## Mobility and/or Internationalisation outlook

Le master est ouvert aux étudiants des pays en développement.

Mobilité Erasmus : les étudiants ont la possibilité de partir à l'étranger pour une partie de la formation. S'adresser au secrétariat et s'informer des conditions générales de l'Université.

## Possible trainings at the end of the programme

Doctoral programmes :

Masters in Public Health may gain access to the doctorate in public health through the doctoral school in Public Health – Health and Society.

## Certificates

L'école de santé publique délivre déjà, dans le cadre de la formation continue, plusieurs certificats d'université (cfr : site de l'Institut universitaire de formation continue et de l'unité des Sciences hospitalières).

A la liste actuelle s'ajouteront de nouveaux certificats construits à partir de sous ensemble du master.

A titre d'exemple sont prévus :

- un certificat en Gérontologie
- un certificat en Santé et handicap
- un certificat en Gestion hospitalière
- un certificat en Education du patient
- un certificat en Sciences et clinique infirmières
- un certificat en Economie de la santé.
