STOM2MC - Introduction

Introduction

STOM2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Stomatology (Ministerial Decree of 26.04.1982, published on 01.07.1982).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years : 3 years of foundation studies and 2 years of higher studies . During the first 3 years of basic training, the candidate will follow all the courses and take all the exams of the three undergraduate years in Dental Sciences. He will be exempt from doing these if he already a graduate in Dental Sciences, and will, in that case, be authorised to immediately embark on his higher study programme. Besides the theoretical activities and clinical practices, during each one of the five years, the candidate will have to present personally written scientific pieces of work either orally or in writing, before societies or in scientific reviews. All of the candidate's activities will be attested by means of his apprenticeship record report and the "ongoing" evaluation of these will take place twice a year (see below).

The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

STOM2MC Programme

Detailed programme by subject

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

STOM2MC - Information

Access Requirements

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

General access requirements

Translated from https://www.gallilex.cfwb.be/fr/leg_res_01.php?ncda=39681&referant=I02

Art. 112. of the "Décret définissant le paysage de l'enseignement supérieur et l'organisation académique des études" :

§ 1. In accordance with the general requirements established by the academic authorities, students who have:

1. a master's degree;
2. an academic degree similar to the one mentioned in the preceding paragraph awarded by a higher education institution in the Flemish Community or the German-speaking Community, or by the Royal Military Academy, by virtue of a decision of the academic authorities and in accordance with any additional requirements they may establish;
3. a foreign academic degree recognised as equivalent to those mentioned in paragraphs 1 and 2 pursuant to this decree, a European directive, an international convention or other legislation, in accordance with the same requirements.

The additional admission requirements referred to in paragraph 2 are intended to ensure that the student has acquired the knowledge and skills required for the studies in question. When the additional admission requirements consist of one or more additional course units, these may not represent more than 60 additional credits for the student, taking into account all the credits that he or she may otherwise use for admission. These course units are part of the student's study programme.

§ 2. In accordance with the general requirements established by the academic authorities, a student who holds a title, diploma, degree or certificate of higher education, in the French Community or outside it, which does not grant him or her eligibility for admission to a specialised master's course by virtue of the preceding paragraph, may nevertheless be admitted by the jury of the course in question, in accordance with the additional requirements that it establishes, if the totality of the higher education that he or she has completed or the expertise that he or she has acquired is valued by the jury to be at least 240 credits.

§ 3. By way of derogation from these general requirements, the academic authorities may also admit to a specialised master's course holders of a title, diploma, degree or certificate awarded outside the French Community which, in that system of origin, grants direct eligibility for postgraduate studies, even if the studies sanctioned by these credentials are not organised into distinct degree courses or within a time period of at least five years.

Specific access requirements

Specific Admission Requirements

Admission conditions

- The applicant must hold the degree title of Doctor in Medecine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Stomatology, in a Belgian medical faculty. The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of 30.05.2002, relating to the planning of the medical offer for the public, published on 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Stomatology (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Theoretical and practical exams of the three undergraduate years in Dental Sciences (DENT 21 , 22 et 23). "Ongoing" evaluation carried out by the practical training supervisor every six months, also taking into consideration the "savoir," the "savoir-être" and the "savoir-faire" of the candidate.

At the end of the first two years (FUS) of the foundation studies and in conformity with the Ministerial Decree of 16 March, 1999, an oral evaluation, by a jury composed of all the work experience supervisors and the members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery is carried out and involves:

- the presentation of 3 clinical cases
- the resolution and discussion of a clinical case presented by the jury
- an average score of 60% is needed and is sufficient for passing this exam ; in case of failure, the candidate is authorised to retake the exam once again within 3 months, but in August at the latest (possibly after a complement of training depending on the directives of the jury). The final evaluation is carried out by a jury composed of the university and non-university practical training supervisors, and by members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery and involves :
 - Theory: theoretical questions from the European Board
 - Clinical studies : presentation of clinical cases personally diagnosed and treated
 - Practical studies : resolution of clinical cases presented by the members of the jury
 - Scientific cases : scientific pieces of work, published and/or presented before scientific societies.

Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Stomatology. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
