January - February - March 2025

Dear all,

A look back at a rich and inspiring trimester

As we reflect on the past trimester, we recognize it has been particularly rich in events.

Honoring responsible AI and ethical research

First, I would like to revisit the SST DHC ceremony. During this ceremony, four outstanding personalities were honored with a DHC under the theme **“Responsible AI for Human Development.”** It was an incredible opportunity to meet and engage with scientists who not only excel in their respective fields but also embody a profound sense of humanity.

Notably, the LIDAM, in collaboration with the Faculty of Bioengineers, awarded a DHC to Prof. **Yves Moreau**, professor of bioinformatics at KU Leuven, specializing in the intersection of artificial intelligence and clinical genomics. He is deeply committed to **ethical technology** and actively works **against the misuse of forensic DNA databases** and **mass surveillance**. His research aims to develop practical tools for the biomedical field while ensuring data security and ethical standards. Moreau's societal engagement includes advocating for social justice and sustainability in technological innovation.

During his visit, Yves Moreau delivered several talks, including a **keynote presentation** and **workshops**, all of which were deeply inspiring. He wisely and emphatically encouraged us to

reflect on the ethics and transparency of our research. As noted by **Laura Symul**, his LIDAM godmother for the event:

“Yves Moreau is leading by example, and hopefully, he is a very relatable example. His actions inspire us to consider the consequences of science and technology and to use our understanding of these technologies to prevent their ethical misuse.”

The LIDAM is extremely proud to count Prof. Yves Moreau among its DHCs, and we hope this marks the **beginning of further collaboration in the future**.

Welcoming new colleagues

Our "Christmas event," which was more of a "New Year event" this time, took place in January and served as a wonderful occasion to warmly welcome our new academic colleagues: **Stefan, Karim, and Quentin**. We are delighted and proud to have them join our institute.

A trimester of scientific gatherings

Throughout the trimester, we had several enriching opportunities for interaction at various events, including the **Workshop on Electricity Market Design**, the **Ethias Pension Morning**, and a **workshop in honor of Jean-Marie Rolin**. These events showcased the variety of expertise among our members, and I would like to express my gratitude to all those involved in their organization. Hosting such events serves as a vital platform to highlight the remarkable work of our members.

Showcasing research through video

Speaking of visibility, I would also like to **encourage you to explore the new videos** created by some of our young and slightly less young colleagues to gain insight into the diverse research topics pursued within LIDAM. Remember, we are **always looking for enthusiastic volunteers to produce short videos** to showcase our expertise on social networks.

Celebrating academic achievements

Congratulations to our colleagues **Luca and Francesca** for receiving the **MSCA Postdoctoral Grant**, and to **François, Frédéric, and Nathan** for their recognition in **scientific expertise**. I also wish to commend our PhD students **Nathan, Tiziano, and Pavel**, who successfully defended their theses during this trimester. We extend our warmest wishes for their continued success and long, fruitful careers.

Strategic reflections and community building

In addition to these scientific endeavors, several training and social activities took place. At the end of March, the LIDAM Bureau—expanded to include research directors—convened for a collective reflection on **LIDAM's research and communication strategy**. The **outcomes of this reflection** will be shared with your respective entities in the coming months.

Reaffirming our values in a troubled world

Finally, it is impossible to ignore the impact of **worldwide political events**. In this context, we feel it is crucial to reaffirm the importance of **free, independent, and globally open** research. This freedom is indispensable for ensuring rigorous and enlightened scientific advancements that serve society.

In alignment with this principle, the LIDAM Bureau has made the decision to deactivate its X account (formerly Twitter) and remains vigilant—with the support of UCLouvain authorities—about the difficulties some researchers may face in light of current complicated situations in different countries.

Though conflicts and infringements on education and research freedom appear to be increasing, I encourage you not to lose your motivation—and, even if it feels naive, your hope—that **our teachings and research can contribute to creating a better world**.

As someone wisely remarked on the radio recently (his name, unfortunately, escapes me):

Education expenses should be considered part of defense spending.

I completely agree with this idea, which is clearly more than just a matter of money. It invites us to enlarge the concept of education to also encompass independent, ethical, and high-quality research.

Best regards,
Catherine.

COOPERATION

SMCS & UNamur : a new agreement

The SMCS and UNamur have officially joined forces in the field of humanities through a recent agreement. This partnership strengthens their mutual dedication to academic excellence and paves the way for promising future projects.

SCIENTIFIC EXPERTISES

■ François Maniquet (CORE)

elected Fellow of the Society for the Advancement of Economic Theory (SAET)

We are proud to announce that François Maniquet has been elected Fellow of the Society for the Advancement of Economic Theory (SAET), recognizing his outstanding contributions to the field.

He joins an esteemed group of economists, becoming the fourth fellow from Belgium (all from CORE) alongside Jacques Drèze, Claude d'Aspremont, and Jacques Thisse.

More info : <https://saet.uiowa.edu/economic-theory-fellows/>

■ Frédéric Vrins (LFIN)

joins the Editorial Board of *Statistics*

Frédéric Vrins has been appointed as Associate Editor of *Statistics* (Taylor & Francis), an international research journal publishing high-quality contributions in statistical theory, methods, and applications. Congratulations to Frédéric!

More info : <https://www.tandfonline.com/journals/gsta20/about-this-journal#aims-and-scope>

 **Nathan Lassance** (LFIN)
receives a *Distinguished Service Award* from **Management Science**

We are proud to announce that Nathan Lassance has received a *Distinguished Service Award* from *Management Science*, recognizing his exceptional contributions as a reviewer. This award honors associate editors and reviewers who have provided outstanding service in the manuscript evaluation process.

EVENTS

LIDAM Christmas event

On January 14th, the LIDAM community gathered at the Aula Magna and Louvain House for an inspiring and convivial afternoon.

The event kicked off with a warm welcome coffee, followed by a series of academic presentations highlighting the diversity and excellence of research within LIDAM:

15:30 – Prof. Stefan Creemers (CORE)

16:00 – Prof. Karim Barigou (ISBA)

16:30 – Prof. Quentin Lété (CORE)

After these thought-provoking talks, the event concluded on a festive note with a Christmas and New Year drink, offering a great opportunity for networking and informal discussions.

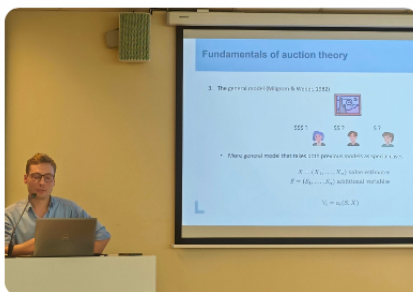

Workshop on Electricity Markets Design

On 27 January 2025, researchers in economics and operational research came together to discuss energy challenges and explore innovative solutions at «**Workshop on Electricity Markets Design**» .

10 speakers presented their topics in Brussels : Lesia Mitridati (DTU, Denmark), Anthony Papavasiliou (NTUA, Greece), Pär Holmberg (IFN Stockholm, Sweden), Silvester van Kooten (UJEP, Czech Republic), Marion Ott (ZEW, Germany), Estelle Cantillon (ULB, Belgium), David Wozabal (VU Amsterdam, Netherlands), Han La Poutré (CWITU Delft, Netherlands) and Nicolas Astier (PSE, France).

The following day saw the «**PHD workshop on Energy systems**», which was a great opportunity for junior researchers in economics, operations research, and engineering to connect, share ideas, and expand their networks.

DHC 2025 – Responsible data science for human development

On February 27, during UCLouvain's honorary doctorate ceremony for the Science and Technology Sector, **Yves Moreau** (KU Leuven) was honored for his pioneering work in data science and bioinformatics.

A well-deserved recognition for his commitment to **responsible AI**, particularly in defending human rights and fighting mass surveillance.

Congratulations to **Yves Moreau** and his mentor **Laura Symul** (LIDAM/ISBA) for their shared expertise on the ethical challenges of data and AI in health.

Keynotes & workshops on responsible data science

On Friday, February 28, a series of keynotes and interactive workshops explored the theme "Responsible Data Science for Human Development."

During the morning session, award recipients shared their insights, including Yves Moreau, who presented on *"Ethics is not a checkbox exercise."*

In the afternoon, interactive workshops facilitated by PhD students and academic experts allowed participants to engage further with the topics discussed in the keynotes.

Ethias Pension Morning : Revision of guaranteed rates under LPC

On Friday, March 14, LIDAM and Ethias hosted a new session of the *Pension Morning* series, featuring **Dave Tombeux** and **Corinne Merla**. The session focused on the **"Revision of guaranteed rates under LPC"**, addressing key complexities surrounding guaranteed returns in occupational pensions.

The discussion highlighted the ongoing challenges of maintaining guaranteed rates, positioning Belgium, alongside Switzerland, as one of the only countries enforcing such requirements.

Honoring Jean-Marie Rolin : a successful event

On March 14th, UCLouvain hosted an event in honor of Jean-Marie Rolin, a key figure in the field of statistics. The event featured presentations from renowned researchers on topics such as Bayesian inference and survival analysis.

The day culminated with a discussion of his book *Nonparametric Bayesian Inference*, followed by a convivial gathering to celebrate his legacy. The event was a great success and a fitting tribute to his significant contributions to the field.

TRAININGS

Enhancing our workflow with AI

On March 27, the entire LIDAM administrative team took part in the second session of the AI training. The goal? To apply AI tools to the team's daily tasks.

A big thank you to Jeremy from Marketing Makers for this insightful session!

Boosting research communication: "Presenting with Impact" Training Success

The "Presenting with Impact" training, delivered by The Floor is Yours, equipped 20 PhD students from CORE, LFIN, ISBA, and IRES with essential presentation skills. Held on 10, 17, and 19 March, it combined practical workshops, small-group try-out sessions, and personalized feedback to enhance research communication. Participants praised the focus on content, performance, and slide design, with a supporting book, *The Floor is Yours*, available at the Lidam library. The positive feedback highlights the course's effectiveness, encouraging consideration for future sessions.

More info : [Presenting with Impact](#)

Social Activities

Wrapping up 2024, welcoming 2025

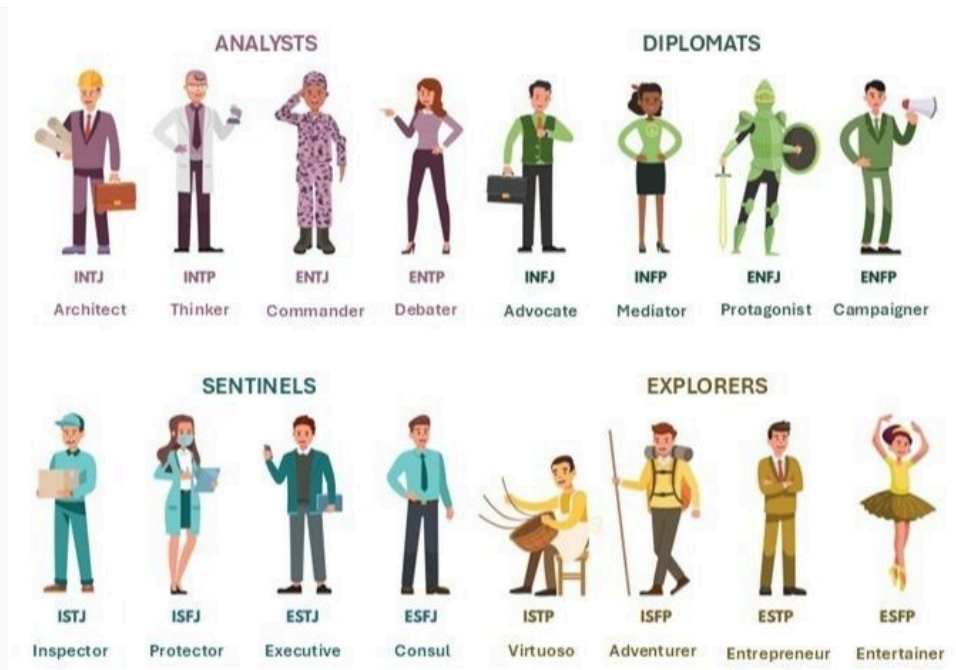

The administrative team of CORE and LFIN gathered at *L'Acrobate* to celebrate the end of 2024 and the beginning of 2025, joined by Per Agrell, Daniele, Daniele Catanzaro, and Frédéric Vrins.

The purpose? To connect, share, and strengthen bonds. These moments of gathering are essential to fostering collaboration, building trust, and creating a sense of community within our teams as we prepare for the challenges and opportunities of the year ahead.

LIDAM Administrative team : Teambuilding

On February 18, the entire LIDAM administrative team took part in a teambuilding session. The theme? Getting to know each other better and improving teamwork through a deeper understanding of one another using the MBTI.

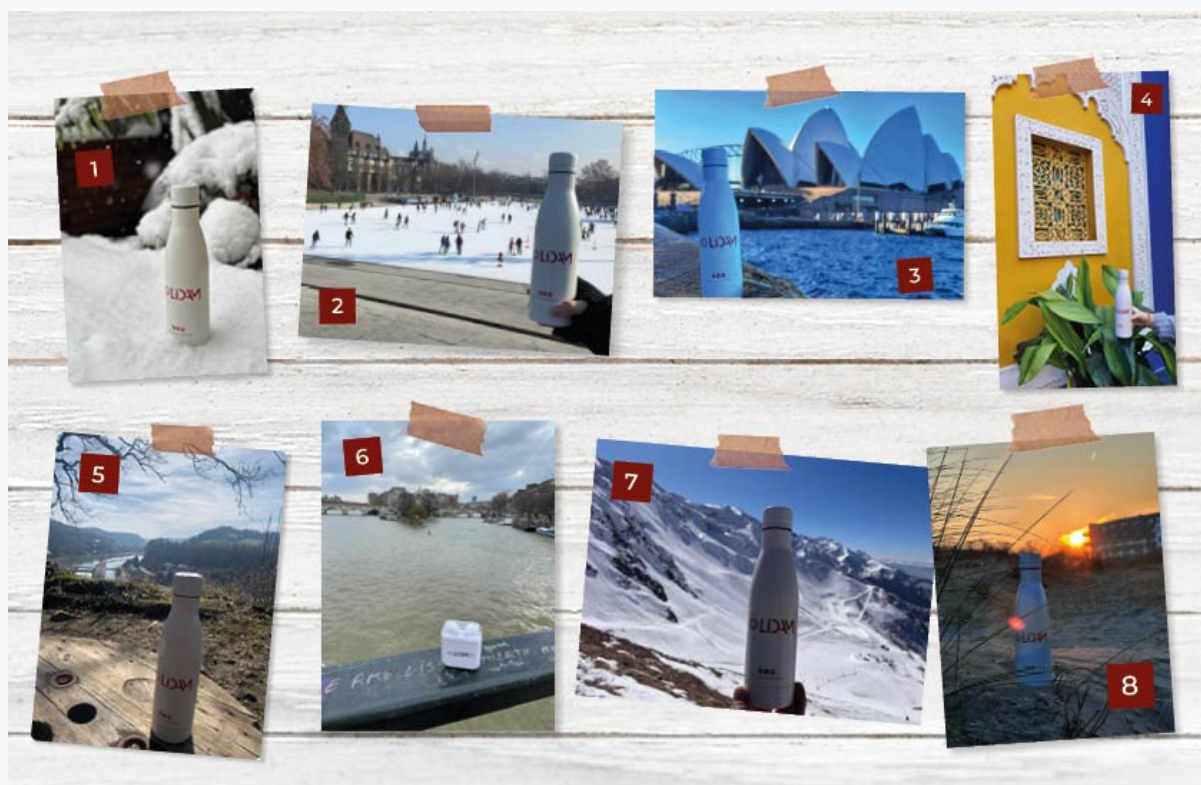

A big thank you to Pierre, our facilitator, and to the whole team for your participation!

The LIDAM, it's also ...

LIDAM AROUND THE WORLD

By the sea or in the mountains, on foot or by plane, in wind or snow, under the sun or in the most prestigious places, LIDAM travels on all continents.
