

SC

BIOL3346 Diagnostic écologique

[30h]

This two-yearly course is taught in 2005-2006, 2007-2008,...

**Teacher(s):** Freddy Devillez, Renate Wesselingh  
**Language:** french  
**Level:** 3rd cycle course

### Aims

Help the student in his advanced study of different groups of plants and/or animals, mostly on the aspects of taxonomy and classification.

### Main themes

These work sessions will consist for example of occidental europe Angiosperms and/or Cryptogams (like Bryophytes, diatomeesXX, ..), l'avifauneXX, l'entomofauneXX, (LepidopteresXX, microfaune des litièresXX). The observations will be, depending on the circumstances, on anterior collections and of more recent ones; they will end by a seminary relative to they group studied.
