Aims

The knowledge of certain facts related to German Landeskunde is necessary in forming future German teachers: This course will impart essential information about German history from 1945 until the reunification of 1990. Political, economical and institutional aspects will be stressed.

Main themes

We cannot understand the present situation in Germany without referring to its previous history since the end of World War II. After the collapse of 1945, the country was fragmented into four occupation zones. The tensions between the former Allied nations led to the Cold War and the foundation of two German states. The Federal Republic of Germany integrated itself into Western political structures (NATO, EEC). The end of the Cold War led to a new situation culminating in the crisis of the Communist regimes, the fall of the Berlin Wall and the reunification of the two German states.
