

INGI2271 Systèmes de gestion de bases de données

[30h+30h exercises] 5 credits

This course is taught in the 2nd semester

Teacher(s): Alain Pirotte (coord.), Marco Saerens

Language: french

Level: 2nd cycle course

Aims

- To understand the main functions of a database-management system
- To understand the concepts and techniques underlying those functions
- To be able to represent in a database the information contents of an application domain
- To be able to implement a simple application involving database management (data structuring, and programming database queries and modifications)

Main themes

- Introduction to the entity-relationship model
- Bases of the relational model: data structures and algebra
- Logic-based relational languages to define and manipulate data
- Critical study of the SQL language
- Database application programming
- Functions and architecture of database-management systems
- Management of concurrent database accesses and associated techniques of recovery after failures
