Financial Dimensions of an International Company

Organizing the International Dimensions of a Company

Managing Human Ressources Internationally

Administrating Exports

METHODOLOGY

The teaching methodology to be used in the course is a combination of traditional and active teaching methods (lectures, work in groups, presentation of experiences). The theory will be provided mainly through the hand outs and required readings.

The lectures will complement the readings. They will also be an opportunity for answering questions related to the readings.

The practical side of international business is given through cases and, on two occasions, exchange of experiences and a small research.

Company representatives will share their experiences related to specific topics.
