

**TECO**RELI2890 **Problèmes actuels d'évangélisation**

[30h] 2 credits

**Teacher(s):** Henri Derroitte  
**Language:** french  
**Level:** 2nd cycle course

**Aims**

Preaching the Gospel is essential to the very existence of the Church. In a world with shrinking borders, the forms this preaching assumes pose new problems. Theological reflection on evangelisation should take as much into account the historical nature of the Church as the evolution of the contemporary world. Evangelisation involves nations and forms of life too.

**Content and teaching methods**

The course deals with contemporary questions arising in evangelisation: its presence to diverse human cultures and modernity; human dignity and liberation; religious and convictional pluralism. It attempts to decipher the various paradigms of evangelisation. It tries to distinguish the logics confronting one another in the evangeliser/evangelised relationship and to distinguish what is theological and what is not.

**Method:** the method is interactive and based as much as possible on the experience, contributions and needs of course members.
