ECON3330 History of Economic Thought

[30h] 3.5 crédits

**Enseignant(s):** Michel De Vroey  
**Langue d'enseignement :** anglais  
**Niveau :** cours de 3ème cycle

### Résumé : Contenu et Méthodes

In 2001-2002 the topic of the course is controversies over involuntary unemployment in macroeconomics from Keynes to New Keynesians. Seminal articles from the following authors will be read and discussed: Keynes, Hicks, Patinkin, Clower, Barro and Grossman, Friedman, Lucas, Shapiro and Stiglitz, Solow and Lindbeck and Snower.

The course will take a seminar form, with each class being devoted to reading a seminal paper. Students will be expected to have read it in advance. Most of the class time will be devoted to clarifying the paper under discussion and confronting it with the others.
