

## Faculty of Economic, Social and Political Sciences

### ACTU2122 Additional life insurance components

[30h] 3 credits

**Teacher(s):** Michel Denuit  
**Language:** French  
**Level:** Second cycle

#### Main themes

To familiarise students with the theory of life insurance policies covering several people, and to make a detailed study the theoretical bases of these transaction, and of transactions covering just one person.

#### Content and teaching methods

##### Content

The same subject as on Course ACTU 2121, but with more technical additional clauses, and clauses covering several people. There will also be an examination of invalidity insurance.

##### Methodology

The course will be delivered in the form of lectures. Improvised theoretical exercises will ensure that students participate actively.

#### Programmes in which this activity is taught

**ACTU2MS** Master en sciences actuarielles, à finalité spécialisée

#### Other credits in programs

<b>ACTU21MS</b>	Première année du master en sciences actuarielles, à finalité spécialisée	(3 credits)	Mandatory
