AMCO2345 Architectural theory seminar

[30h] 3 credits

This two-yearly course is taught in 2006-2007, 2008-2009,...

This course is taught in the 2nd semester

Teacher(s): David Vanderburgh
Language: French
Level: Second cycle

Aims

Develop students' ability for theoretical positioning and production, as befits a future practitioner, as a necessary complement to consolidation of a personal design approach.

Main themes

Students are invited to formulate, individually and as a hypothetical construct, a certain reading of the theoretical field. During a first, "objective" phase, students describe what is necessary in order to assemble a "kit of tools" in architectural theory.

In the second phase, they furnish the content of such a kit so as to imagine its operational value (appropriation and commitment).

The seminar format allows a critical debate to develop.

Content and teaching methods

This course will no longer be offered after academic year 2006-2007
