Faculty of Applied Sciences

AUCE1607 Atelier 7 : Synthèse [120h] (8 credits)

[120h] 8 credits

This course is not taught in 2005-2006
This course is taught in the 2nd semester

Teacher(s):   Yves Lepere, Nicolas Van Oost
Language: French
Level: First cycle

Aims

By the end of the course, students will be able to:
Define the questions that come before the programming stage.
Identify the references and disciplinary resources necessary for the project.
Develop and formulate a specific programme, appropriate to the context.
Bring a programme and a site into mutual coherence through design work.
Produce a synthetic view of landscape, historical, institutional, urban and technical dimensions via the project.
Prepare a full project presentation.

Main themes

Extension of, and qdditional cumulative experience in, developing a design approach.
The design question is not given. A theme is proposed, and students must develop a position.
According to the proposed theme, students work in groups on a preparatory analysis: definition of a site, a programme, and identification of the theoretical questions raised by the theme.
Design work thereafter is individual.
The way in which the theme is posed should guarantee a plurality of approaches and the potential for an architectural realisation at appropriate scales: site plan, overall plan at 1/2000, 1/1000, 1/500; plans, sections, elevations at 1/200, 1/100, 1/50; details and profiles at 1/20, 1/10, 1/5, 1/2; models and perspectives.
This work will emphasize manual and computer-aided drawing skills developed thus far in the study programme.
