

CHIM2224 Analytical chemistry II

[22.5h] 2.5 credits

This course is taught in the 2nd semester

Teacher(s): Yann Garcia

Language: French

Level: Second cycle

Aims

This course is an extension to CHIM 2154 and gives a general introduction to the main instrumental methods. The emphasis is put on the principles, application ranges, possibilities and limitations of each techniques. The formation should allow the student to direct an analysis towards the most appropriate solutions but does not correspond to a specialisation in the fields covered by this course. Complement on gas and liquid chromatography

Main themes

- Complement on electroanalytical methods
- X-Ray diffraction and X-ray fluorescence
- X-Ray absorption: EXAFS, XANES and WAXS
- Neutron diffraction (main instruments)

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Prerequisites: CHIM2154

Students concerned: CHIM22, ESPD3DS/ST, SBIM3DS/T, TOX2.

Programmes in which this activity is taught

ESP3DS Diplôme d'études spécialisées en santé publique

ESP3DS/ST Diplôme d'études spécialisées en santé publique (santé au travail)

SBIM3DS/TA Diplôme d'études spécialisées en sciences biomédicales
(Toxicologie analytique)

Other credits in programs

CHIM22 Deuxième licence en sciences chimiques

ESP3DS/TI Diplôme d'études spécialisées en santé publique (santé au travail - toxicologie industrielle)
