COMU2267 Media systems of distance learning

[30h] 4 credits

Teacher(s): Daniel Peraya
Language: French
Level: Second cycle

Aims

The course aims to:

1. give students a theoretical and methodological framework that addresses the wide range of resources of mediatised communication used in the field of total or part distance learning;
2. introduce analytical tools to evaluate the relevance of mediatised communications and training resources in the light of pedagogical constraints and of those relating to education systems;
1. introduce students to the real practice of distance learning technology.

Content and teaching methods

The course will address:

1. from a theoretical point of view: concepts of mediatised educational communication, and media-based educational resources, including a longitudinal approach to relationships between the field of education science and communication. The basis of distance learning compared with media-based resources and the way they develop: links with virtual campuses and Web based learning environments;
2. from the point of view of resources and practices: various resources of mediatised training and communication (learning activities, the tools of synchronous and asynchronous communication, and collaboration tools). The methodological principles of selecting, using and evaluating the various resources presented;
3. from the research point of view: forms of semio cognitive representations in electronic publications in the 'Webatture'.
4. from a technological point of view: skilled use of the communications tools needed for education and distance teaching activities.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Technological pre requirement: a command of navigation, mailbox and document transfer software.

Conceptual pre requirement: semio pragmatic theories.

Assessment: Students will be assessed on the basis of individual or group work presented in the form of a website.

Supervision: An Assistant for the supervision and monitoring of students' work. A classroom with Internet connections and large screen projection. An IT room equipped with the software needed for distance learning (mainly NetMeeting and a QuickCam camera).

Programmes in which this activity is taught

COMU2M1 Master en information et communication
COMU3DS Diplôme d'études spécialisées en communication multimédia

Other credits in programs

COMU21/MS	Première licence en information et communication (Médiation des savoirs) (4 credits)	
COMU22/AM	Deuxième licence en information et communication (Analyse des médias)	
COMU22/MS	Deuxième licence en information et communication (Médiation des savoirs)	Mandatory
COMU22/RP	Deuxième licence en information et communication (Relations publiques et communication d'organisation)	
COMU2M1/MS	Master en information et communication (option médiation des savoirs) (4 credits)
