

Faculty of Economic, Social and Political Sciences

COMU2273 Seminar on socio educational communications research

[30h] 4 credits

Teacher(s): Jean-Pierre Meunier, Daniel Peraya
Language: French
Level: Second cycle

Aims

By the end of the seminar, students will be able to study the question of learning via the education media by incorporating contributions from the other subjects concerned (mainly education science courses with a communications approach).

Main themes

The seminar aims to draw up an inter disciplinary perspective on educational media. The themes will depend partly on the kinds of media that it is planned to use (e.g. educational programmes, new technology, distance learning, and museums and exhibitions), and partly on matters specifically relating to learning. Examples of themes include learning through images, the relationship between text and para text in learning, collaborative learning, and new technology.

Content and teaching methods

Content

Variable content (see 'Course specifications').

Methodology

" Analysis of texts and of experiences relating to the chosen themes.

" Lectures given by specialists.

" Supervised research work.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

The course requires students' work to be supervised by an Assistant
