

Faculty of Medicine

DENT1202 Anatomie pathologique générale et bucco-dentaire 1re partie

[15h+20h exercises] 2 credits

This course is taught in the 2nd semester

Teacher(s): Etienne Marbaix (coord.), Birgit Weynand
Language: French
Level: First cycle

Aims

At the end of the course, the students will be able

- to understand the elementary lesions which constitute the basis of the development of the most important pathologies
- to understand the histopathology of the most frequently encountered oral and cutaneous lesions
- to link together pathogeny, clinical expression and complications of the above-mentioned diseases.

Main themes

Demonstration of the morphological aspects of the most frequently encountered oral and cutaneous lesions.

Content and teaching methods

Content:

General part : basic lesions applicable to oral and cutaneous pathology : necrosis, adaptation mechanisms, inflammation, immunity, deficiency and hypersensitivity, growth disorders and neoplasia, non-tumoral osteo-articular pathology.

Oral and cutaneous histopathology : study of macroscopy and microscopy of the most important pathologies : lesions of the oral mucosa and skin, dental lesions and odontogenic pathology, pathology of the parodontis

Methods:

Lectures with powerpoint support, followed by the analysis of microscopic slides illustrating the studied lesions

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Needed notions : general histology, oral histology, head and neck anatomy and embryology

Evaluation : to be determined by the teacher

Support : hand-out, histological slides

Other credits in programs

DENT12BA	Deuxième année de bachelier en sciences dentaires	(2 credits)	Mandatory
