[30h] 3 credits 2nd semester

Language: French

Level: course de 1st cycle

The course is centered on the communication and uses a method halfway between the communicative and the notion-functional one. Therefore, the elements of the code are not acquired by the study of lists of vocabulary or the structural approach of grammar exclusively. These elements are built-in in significant contexts, grouped according to functional contents (to give and ask personal data, to speak about the usual actions, to speak about the spare time and tastes, to describe a city, to suggest activities, to speak about the future projects, etc), and later they are practiced with exercises requiring the development of an integral communicative competence. The course provides the student with didactic materials made by the professor according to the described method and crated from current bibliography including more than 40 works not only to be used at class but also to practice the controlled autonomous practice. The materials include very elaborate grammatical tables and exercises of systematization, but the typology of exercises is very heterogeneous: songs, plays, role plays, real or adapted texts or created in a teaching goal, publicities, etc.
