

Higher Institute of Philosophy

FILO2003 Ethics in the Natural Sciences

[15h+15h exercises] 2 credits

This course is taught in the 2nd semester

Teacher(s): Philippe Baret, Bernard Feltz, Thierry Hance
Language: French
Level: Second cycle

Aims

The aim of the course is to introduce the basic concepts necessary for an analysis of the ethical implications of contemporary scientific developments. The seminars will consist of a more detailed discussion of certain questions.

Main themes

The different systems of ethical justification and their relevance to the analysis of the ethical implications of scientific developments.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Assessment:

The assessment is based on a group project done by the students, divided into interdisciplinary groups, on a topic of their choice.

Supporting material:

The interdisciplinary nature of the group responsible for the course and of the students is particularly stimulating.
