

GEOG2321 Geography Education

[22.5h] 2 credits

Teacher(s): Marie-Laurence De Keersmaecker (coord.), Dominique Laduron
Language: French
Level: Second cycle

Aims

By the end of this course, students should have a thorough understanding of the study of geography and of the "geographic and social studies" course in the later years of secondary education.

Main themes

The course deals with decisions on the content of geography teaching, including its relationship with geology and with economics and social science. It also deals with mastering approaches, methods, and techniques for the teaching of geography. The course will take as its starting point examples of learning situations in the subject. These situations cover the entire syllabus for geography and for "geographic and social studies". They are analysed using learning techniques and tools and are organised according to different examples of approach and method.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

A complementary course to that in general teaching methods, to be followed in parallel. Obligatory course for teacher-training students taking the geographic sciences option. Optional course for science teacher-training students.

Programmes in which this activity is taught

SC2A Agrégation de l'enseignement secondaire supérieur (sciences exactes)

Other credits in programs

SC2A/G	Agrégation de l'enseignement secondaire supérieur (Géographie) (Géographie)	Mandatory
