

 Faculty of Applied Sciences

**INGI2123**    **Calculability and complexity**

[30h+15h exercises] 4 credits

This course is taught in the 2nd semester

**Teacher(s):** Yves Deville (coord.), Pierre Dupont, Baudouin Le Charlier  
**Language:** French  
**Level:** Second cycle

**Aims**

- To understand, recognize and identify the limits of computing science
- To understand the foundations, the similarities and differences of the main computability models
- To identify, recognize and understand non computable and untractable problems

**Main themes**

- Computability : problems and algorithms, computable and non computable functions, reductions, undecidable classes of problems (Rice), fix point theorem, Church-Turing thesis
- Main computability models : Turing machines, recursive functions, lambda calculus, automates
- Complexity theory : complexity classes, NP-completeness, Cook's theorem, how to solve NP-complete problems

**Content and teaching methods**

see "Main themes"

**Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)**

- Prerequisites

This course presupposes the knowledge of material covered in the following course

(1) LINF2121 : Algorithmique et structures de données

- References

(1) Sipser M. Introduction to the Theory of Computation. PWS Publishing Company, 1997

(2) P. Wolper. Introduction à la calculabilité. (2nd edition) InterEditions, 2001.

<http://www.ucl.ac.be/etudes/cours/ingi2123.htm>**Programmes in which this activity is taught**

**INFO2**            Ingénieur civil informaticien  
**LINF2**            Licence en informatique

**Other credits in programs**

<b>INFO21</b>	Première année du programme conduisant au grade d'ingénieur (4 credits) civil informaticien	Mandatory
<b>LINF21/GN</b>	Première licence en informatique (informatique générale) (4 credits)	Mandatory
<b>LINF21/GS</b>	Première licence en informatique (informatique de gestion) (4 credits)	
<b>MAP22</b>	Deuxième année du programme conduisant au grade d'ingénieur civil en mathématiques appliquées (4 credits)	
<b>MAP23</b>	Troisième année du programme conduisant au grade d'ingénieur civil en mathématiques appliquées (4 credits)	
<b>MATH22/G</b>	Deuxième licence en sciences mathématiques (4 credits)
