

## Faculty of Medicine

### KINE1034 Psychomotor therapy

[7.5h+15h exercises] 2.5 credits

This course is not taught in 2005-2006

Language: French

Level: First cycle

#### Aims

At the end of the course, the successful student will have acquired the theoretical knowledge and practical competence necessary for the psychomotor education and re-education of healthy and handicapped children. The course addresses the fundamental aspects of psychomotor development during childhood while highlighting the discrepancies due to a physical or a mental handicap.

#### Main themes

Theory and practice via clinical examination of the psychomotor development of the healthy child from age 0-3:

- archaic reflexes
- osteo-tendinous reflexes
- motor reactions
- muscle tone
- motor learning and performance

Theory and practical exercises related to the psychomotor development of the healthy child from age 3-10:

- global and fine motor development
- perceptive organisation
- spatio-temporal organisation
- laterality and body awareness

#### Content and teaching methods

Will be completed by the titular professor when the courses will be attributed
