

Faculty of Medicine

KINE2140 Seminar in physical therapy

[45h] 2.5 credits

Teacher(s): Dominique Bragard, Thierry Deltombe, Jacques Denayer, Christine Detrembleur, Thierry Lejeune, Jean-Louis Thonnard (coord.)
Language: French
Level: Second cycle

Aims

Savoir réaliser une synthèse sur un sujet traitant de la rééducation ou de la réadaptation de patients (rééducation neurologique, orthopédique, pédiatrique, etc...) et ceci au départ d'un article repris dans la littérature internationale.

Main themes

The students present by group of more or less three students a given subject each year by the teachers. They must seek the articles treating of this subject in the international reviews. The students expose the studied articles, criticize them and a discussion on the subject is then undertaken. Being given the diversity of the topics approached, this course will be cotitularisé. The devoted topics are inter alia: - orthopedic and traumatic Rehabilitation including the spinal column; - cardiorespiratory and vascular readjustment; - neurological readjustment; - evaluation of the handicapped person and anybody old, including the rehabilitation of walk. The contents should take account of biomechanics and the kinesitherapeutic, physiological techniques...

Content and teaching methods

The students present by group of more or less three students a given subject each year by the teachers. They must seek the articles treating of this subject in the international reviews. The students expose the studied articles, criticize them and a discussion on the subject is then undertaken.
