

Faculty of Psychology and Education Sciences

LOGO2221 Troubles, méthodes d'examen et traitements logopédiques de la voix

[22.5h] 3 credits

Teacher(s): Dominique Morsomme
Language: French
Level: Second cycle

Aims

To introduce general theoretical elements about the voice. Review of the basic anatomico-physiological elements necessary to understand and to correct the voice disorders

Main themes

Classification of the disorders : dysfunctional dysphonias (simple, complex, particular), dysorganical dysphonias, child hoarseness, particular cases.

Speech therapy description of the disorder.

Speech therapy examination of the voice.

Critical studies of the various reeducation approaches.

Basic notions of voice hygiene.

LOGO 2222 completes LOGO 2221 and aims at allowing the students to practically tackle the various pathologies of the voice, i.e. to prepare the contacts with the patients
