

Faculty of Psychology and Education Sciences

LOGO2243 Clinique logopédique du langage oral

[30h] 4 credits

This course is taught in the 2nd semester

Teacher(s): Marie-Anne Schelstraete
Language: French
Level: Second cycle

Aims

To supplement the the first level practical exercises by tackling less frequent pathologies and by presenting detailed analysis of individual cases.

Main themes

- Oro-facial sphere
 - orthodontics and dyslalias
 - tubal reeducation
 - rhinophonia
- Disorders of language development
 - delayed development of speech
 - delayed development of language
 - dysphasias
 - child stuttering
 - stutterings - clutterings
 - theoretical frames for orthophonic therapies

Content and teaching methods

Presentation of less frequent oral language pathologies and/or pathologies with a complex diagnosis.

Presentation of detailed individual cases, including the developmental history of the case, the language anamnesis, the language examination, the steps of diagnosis, how to formulate a therapeutical hypothesis, the choice of the intervention method and the assessment of the intervention efficacy .

A part of the course will also be devoted to the analysis of spontaneous productions and to the use of theses analyses in diagnostic and therapeutical aims.
