

## Faculty of Applied Sciences

### MECA2755 Industrial automation.

[30h+30h exercises] 5 credits

This course is taught in the 1st semester

**Teacher(s):** Hervé Buyse, Paul Fisette, Jean-Claude Samin  
**Language:** French  
**Level:** Second cycle

#### Aims

Provide students with basics in the fields of :

- Industrial sensors
- Pneumatic and electropneumatic systems
- Robotics
- Programmable Logic Controllers (PLC)
- Field bus technology
- Mechanical indexors

Give students the opportunity to practice in the field of sequential automation, via seven laboratories dealing with pneumatic and electropneumatic logics, as well as programming an industrial conveyor.

#### Main themes

- Industrial sensors
- Pneumatic and electropneumatic systems
- Industrial Robotics
- Programmable Logic Controllers
- Field bus technology
- Mechanical indexors

## Content and teaching methods

### 1. Introduction (1 lecture) :

What is industrial automation and what does it involve ? - course organization - grading - illustrations (video)

### 2. Industrial sensors (2 lectures)

Types and characteristics of sensors

Presentation of different types of sensors - principle and technology:

- displacement/position sensors
- velocity/acceleration sensors
- force/torque sensors
- pressure sensors
- #

### 3. Pneumatic and electropneumatic systems (3 lectures, 5 labs)

Pneumatic systems :

- compressed air : production, filtering, lubrication
- valves and cylinders: technology, applications, dimensioning
- pneumatic logics : simple circuits - study of signal problems
- bi-stable /mono-stable devices
- Installation : layout and dimensioning

Electropneumatic systems:

- electro-valves, relays, # : technology, dimensioning
- electropneumatic logics : simple circuits - study of signal problems
- bi-stable /mono-stable devices

### 4. Robotics (3 lectures)

Introduction: industrial robots, economic/statistical aspects

Robot classification, performances

Robot components :

- actuators
- transmission elements
- effectors (grippers, #)

### 5. Programmable Logic Controllers (3 lectures + 2 labs)

Introduction : origins, PLC versus electropneumatic logic

Technology, functioning, peripheral devices

Programming languages

Ladder programming : principles, practical examples

Grafcet programming : origins, principles, practical examples

Functional approach to sequential programming (Grafcet based)

### 6. Field bus (1 lecture)

Origins, principle - economic aspects

Technology, description of widespread field buses (Profibus DP, ASI, #)

Fieldbus and pneumatic systems

### 7. Mechanical indexors (1 lecture)

Applications, advantages, limitations

Technology : paradiromic and globic cams

Characteristic parameters (dwell, index, stops, double index, #)

Static and dynamic dimensioning - practical examples

## Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Prérequisites : no

Grading : Written exam

Support :

- Notes : sensors, pneumatic systems and robotics
- Copies of slides : PLC, Mechanical indexors, Field bus

Visits to companies are organized during semester 1 or 2 in the field of industrial automation (ex. production lines, car manufacturing, #)

**Programmes in which this activity is taught**

**ECGE3DS/SC** Diplôme d'études spécialisées en économie et gestion (Master in business administration) (Supply Chain Management)

**Other credits in programs**

<b>ECGE3DS/SC</b>	Diplôme d'études spécialisées en économie et gestion (Master in business administration) (Supply Chain Management)	(5 credits)	Mandatory
<b>ELEC22</b>	Deuxième année du programme conduisant au grade d'ingénieur civil électricien	(5 credits)	
<b>ELME22/M</b>	Deuxième année du programme conduisant au grade d'ingénieur civil électro-mécanicien (mécatronique)	(5 credits)	Mandatory
<b>INFO23</b>	Troisième année du programme conduisant au grade d'ingénieur civil informaticien	(5 credits)	
<b>MECA21</b>	Première année du programme conduisant au grade d'ingénieur civil mécanicien	(5 credits)	
<b>MECA22</b>	Deuxième année du programme conduisant au grade d'ingénieur civil mécanicien	(5 credits)	Mandatory
<b>MECA23</b>	Troisième année du programme conduisant au grade d'ingénieur civil mécanicien	(5 credits)
