

NEUR2190 Clinical controversies in Neurology

[15h] 2 credits

Teacher(s): Patrice Laloux, Christian Sindic

Language: French
Level: Second cycle

Aims

The first objective is to increase the expertise of the medical student for establishing a differential diagnosis of neurological diseases. The second objective is to present the molecular basis of some neurological disorders, as multiple sclerosis and paraneoplastic disorders.

Main themes

- 1. A transversal approach of some common complaints observed in the daily practice (for example, in case of headache)
- 2. A more detailed approach of some techniques (analysis of the cerebrospinal fluid) or of some neurological diseases (immune mechanisms in Multiple Sclerosis).

Content and teaching methods

Each course deals with a specific topic and should deapen the basic knowledge of medical students interested by the clinical Neurosciences.
