

Faculty of Economic, Social and Political Sciences

POGE2202 Project Management

[45h] 5 credits

Teacher(s): Philippe Chevalier, Jean Raucent, Daniel Tyteca
Language: French
Level: Second cycle

Aims

At the end of the class, students should be able to

- Know the issues associated with the management of a project
- Master the basic techniques and skills for the management of a project

Content and teaching methods

Introduction to the methodology and techniques of project management

The various aspects of the management of a project (planning, direction, control #) and the integration of the management functions will be studied based on applications :

The notion of project

The different stages of a project

Project based organisation

Project management basics

Planing

Organization

Control

Quality management

This course is a direct link with the course "technological project" and "quantitative project", giving the students the theoretical bases for their projects.
