

Faculty of Psychology and Education Sciences

PSY1345 Project tutoring seminar

[+15h exercises] 2 credits

This course is not taught in 2005-2006

This course is taught in the 1st and 2nd semester

Language: French

Level: First cycle

Aims

The project must be an opportunity for the students to narrow their themes and fields of interest in psychology, the options they will further follow (namely in the master), and to get a first impression of the concerned professional field.

The seminar must insure the specific positioning of competences to integrate the already acquired contents and know-how and particularly those directly related to the university approach: position of a problem, research of critical information, synthetic conclusion, choice of an approach, etc. alone or in group. It must help the students to prepare their synthesis report.

Main themes

The seminar is the place where most of the project group work takes place. It specifically introduces tools and methods to make the realisation easier.

Content and teaching methods

The students will have :

- to present the question to develop
- to present the first answers to clarify it

The project will be initiated during the BAC2 with an information session and will end in BAC3 before Easter.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

The learnings from BAC1 and BAC2

Participation and presentation

Writing advices, processes for data treatment, list of points to take into consideration#

Groups guided by members of the PACS

Other credits in programs

PSP13BA/P	Troisième année de bachelier en sciences psychologiques et de (2 credits) l'éducation (majeure en sciences psychologiques)	Mandatory
