

## Faculty of Theology

### RELI2220 Main Articulations of the Christian Message

[30h] 2.5 credits

**Teacher(s):** Benoît Bourguine  
**Language:** French  
**Level:** Second cycle

#### Aims

This course aims to help the students discover the fundamental elements that structure Christian faith and ethics. It was created for licentiates in other scientific disciplines to allow them to structure a personal synthesis of the various courses they take within the Faculty, courses that may otherwise strike them as rather scattered.

#### Main themes

The course structure depends on the expectations and interests of the students. It generally consists of two parts:

- the method: various ways of conceiving and constructing a theological reflection;
- the content: coherent re-reading of the main articulations of Christian faith.

#### Content and teaching methods

How the Christian faith is thinking about itself? Is it possible to manifest its global coherence? After a survey on the present situation of theology, the main elements of Christian confession are interpreted.

#### Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

This course is a first structured synthesis of the Christian message.
