SEX2401 Gender psychology: special questions

[15h] 2 credits

Teacher(s): Robert Steichen
Language: French
Level: Second cycle

Aims

Detailed analytical study of a particular dimension of sexuality based on clinical texts. The theme may change each year according to the social and scientific problematics, namely the themes of the colloques of the Institut d'Etudes de la Famille et de la Sexualité

Main themes

Some examples of themes treated or to be treated :

- Violences and order in families and couples
- Human and sexual desire: trajectories, object and cause
- Clinics of some sexual variations : perversions, inhibitions, roving
- The relation with the other one between enamoured satisfaction and passion joy
- The construction of sexual identity, in relation with the individual, the person and the subject
- Identity and otherness : the question of the other one (sexual, generational, cultural) and of the Other one (the inconscient, the language, the repository third party) between acceptation, tolerance, rebellion and rejection
- Clinics, sociology and right of the transsexualisms
- Impairment, trauma and et repetition : familial events and structural inscription
- Construction of a clinical anthropology of sexuality
- Etc..

Content and teaching methods

Thorough analytical study of a particular dimension of sexuality based on documentations. The theme changes each year.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)
