

**BIOL2281 Plant's interaction with environment**

[30h+15h exercises] 3.5 credits

This course is taught in the 2nd semester

Teacher(s): Henri Batoko, Stanley Lutts

Language: French

Level: Second cycle

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Prerequisites: basics in plant morphology/morphogenesis and physiology, biochemistry, genetics.

Practical work: The practical work will illustrate precise aspects of the course by integrating physiological and morphological approaches. They will integrate the both parts of the course by examining stress effects on symbiotic system characteristics.

Written support: syllabus or book and review or research articles.

Other credits in programs

BIOL22/B Deuxième licence en sciences biologiques (Biologie des organismes et des populations) (3.5 credits)
