

Faculty of Medicine

DENT2248 Pediatric dentistry: clinical pediatric dentistry, first part

[30h] 3 credits

This course is taught in the 2nd semester

Teacher(s): Charles Pilipili
Language: French
Level: Second cycle

Aims

At the end of the programme students must be able to take care of children and teen-agers by acquiring the basic knowledge to assess the specifics of child and teenager care.

Please keep in mind that this follow up needs specific requirements, including the fact that these patients must benefit of a multidiscipline (stomatologie, periodontics#) approach.

Main themes

The programme is divided in 3 groups :

1) clinical training on Frasaco teeth in order to achieve technical skills only related to paediatric dentistry :

*shape of the cavities on temporary teeth

*endodontic treatment with paste in temporary teeth

*preparing paediatric crowns

2) Before taking care of their own patients, 4th year students get used to visits and dental treatments by doing assistantships. They will cooperate with teachers, postgraduate students or 5th year students.

Goals : get used with burocratic, psychological and physiological requirements .Linkages between the lectures and clinical evidence.

3) After having archieved the points above, 4th year students will work in the dental paediatrics department as part of their general training in the Ecole de Médecine dentaire et de Stomatologie.
