

Faculty of Economic, Social and Political Sciences

PROD3950 Reading workshop on quantitative methods of management and production management

[30h]

Teacher(s): Per Joakim Agrell, Philippe Chevalier, Yves Pochet, Pierre Semal
Language: French
Level: Third cycle

Main themes

This reading workshop aims to give students a space for reflection on recent advances and trends in this field, in terms of orientations and methodology and of managerial and strategic implications

Content and teaching methods

Content

As back-up, the workshop will provide a list of articles that have appeared in the leading scientific journals in the field (and in chapters of books). The content will vary from year to year, as will the members of the academic staff sharing joint responsibility for the workshop.

Methodology

Before each session, students will make a personal and detailed study of the documents to be discussed. The aim of the sessions is to raise any comprehension problems that there may be and, from a critical point of view, to analyse conceptual aspects of the work examined, their methodological choices, and their contributions to the development of knowledge. The workshop will meet every fortnight over two terms.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Assessment: This will be based on students' active participation in workshop sessions, and a check on their knowledge, which will itself be based on an understanding of the reading and their critical analysis.
