[+30h exercises] 2 credits

This course is taught in the 2nd semester

**Teacher(s):** Nady Van Broeck, Emmanuelle Zech  
**Language:** French  
**Level:** First cycle

#### Aims

- to introduce the students to the practice of anamnesis, interview and evaluation in various fields of clinical psychology
- to introduce the students to the analysis and description of institutions in the field of clinical psychology

#### Main themes

In relation with the courses "Pathological psychology" and "Institutions and practices in clinical psychology", group exercises with a tutor on :

- case studies (and how to proceed with these cases about the diagnosis, the interview and the psychological coaching) based on written works or videos, fictive or real, in order to establish psychological distinctions and trackings in psychopathology (individual, couple or family) ;
- descriptions and analyses of organisations and institutions functioning in the field of clinical psychology according to the kind of problem treated and to the treatment proposed.

In relation with the courses of neuropsychology:

- introduction to the anamnesis and the interview in clinical neuropsychology in the field of focal and diffuse brain lesions ;
- introduction to the practice of the major tests and appraisal scales used in the field of adult neuropsychology ;
- integrated case analysis based on videos, medical file and neuropsychological file, with an attempt to interpret the deficiencies

In relation with the course "Clinical intervention, Health and trauma":

- analysis of clinical situations according to elements of the bio-psycho-social model ;
- development of intervention processes ;
- auto-administration of the intervention technics in the field of health
