

Faculty of Psychology and Education Sciences

SEX2353 Research strategies 3:survey methodology

[15h] 2.5 credits

Teacher(s): Guy Lories, Frédéric Nils (supplée Guy Lories)
Language: French
Level: Second cycle

Aims

At the end of the course, the students should be able to design and criticize a questionnaire, to write out the questions according to the rules in this matter, and to exploit the data gathered through uni- and bivariate statistical analyses.

Main themes

The inquiries by questionnaires concerning the family, the couple and its sexuality: essential purpose, kinds of inquiries, design and construction of questionnaires (stages, processes, snares to avoid), economy of the questionnaire, kind of question (social identification, practices, opinions and representations), sample (kind and size), modes of administration, pilot-inquiry, encoding.

Exploiting of the questionnaire: elements of univariate (distributions, central trend and dispersion) and bivariate (crossed tables, comparison of two distributions, correlations main statistical tests) statistical analysis, presentation of the results. Practical exercises.

Other credits in programs
