

ECON2

Licence en sciences économiques (Diploma of the Second Cycle (Licence) in Economic Sciences)

Programme management

ECON Département des sciences économiques Coordinateur :Vincent Vandenberghe (1ère année) Coordinateur :Marthe Nyssens (2ème année)

Study objectives

This programme addresses either students just coming out of the 1st study cycle ("candidature") of Economic Sciences whose aim is a career in business or in administration, or students who already have prior training in another subject. The first year of course covers foundation studies. The second year helps students to specialise within the main subject areas, depending on their interests and under the supervision of a tutor.

In order to deepen their studies, once graduated, students may further their training by registering for a 3rd cycle diploma (DES or DEA). They also have the possibility of opting for a three year programme leading to a master diploma. This decision must therefore be taken after the successful completion of the first year of the programme.

Admission conditions

The following students are entitled access to the "licence" programme in Economic Sciences (ECON 2) and to the "maîtrise" in Economic Sciences (ECON 2M) :

A. Holders of a **university** degree on the following conditions :

- Holders of the first study cycle diploma " *candidat*" *in Economic Sciences or Management* delivered by a university of the French-speaking Community in Belgium, as well as holders of an *equivalent* diploma, delivered by another university, subject to any necessary additions of a limited number of complementary courses to the first year of the programme.
- Holders of other "candidat"," licencié" or "maître" diplomas obtained from another faculty or department in a Belgian or foreign university, subject to the acceptation of their application by the department and the adding of any necessary complementary courses to their first year programme. This acceptation may possibly be subject to the condition of successfully completing a preparatory test which may take the form of a *single year of "candidature" studies* in Economic Sciences and Management.

B. Holders of a non-university higher education diploma on the following conditions :

- Holders of a "*licencié*" *diploma in the economic category*, subject to the possible addition of complementary courses to their first year programme.
- Holders of a " *candidat*" *diploma in the economic category*, subject to successfully completing an *entrance exam* and possibly adding a limited number of complementary courses to their first year programme.
- Holders of a non-university higher education programme, " *gradué*", in accountancy, marketing, transport management, external commerce or computer studies, as well as holders of the lower secondary school teacher-training certificate, subject to successfully completing *a prior year of studies*.

C. Non-university diploma holders from a *non-economic category* have access to the "licence" programme in Economic Sciences on the basis of a "candidat" diploma in Economic Sciences and Management. This may be obtained, in certain cases, by way of a *single "candidature" year*.

Questions concerning applications or complementary information should be addressed to the secretary's office of the Department of Economic Sciences. Questions concerning admission and information linked to the *single year of "candidature"* should be addressed to the secretary's office for the "Candidature" in Economic, Social and Political Sciences.

Admission procedure

The regular conditions and admission procedures are detailed on the web page "Access to studies": http://www.ucl.ac.be/etudes/libres/acces.html

Programme content

ECON 21 First year of studies

The first year of the programme is developed on four levels, without any options : - foundation studies in Microeconomics, Macroeconomics and Econometrics,

- two courses in specific study domains,
- an English course,
- two theme-based workshops

1. Foundation studies (36 credits)

ECON2115	Micro-economics[60h+30h] (12 credits) (in French)	Jacques-Fra
ECON2125	Macro-economics[60h+30h] (12 credits)1+2q (in French)	David De l
ECGE1316	Econometrics[20h+15h] (3 credits) (in French)	Luc Bauwe

ECGE1326 Applied Econometrics[22.5h] (3 credits) (in French) The subject matter of these courses is spread over the two quadrimesters.

2. Specific studies (12 credits)

ECGE1313 European Economics[30h] (6 credits) (in English) ECGE1312 Public Economics[30h] (6 credits) (in French)

rançois Thisse la Croix, Frédéric Docquier ens, Christian Hafner (supplée Luc Bauwens) Fatemeh Shadman Valavi

Hylke Vandenbussche Jean Hindriks

These studies include the supervised reading of a given work (or part of one) or articles, which are not covered in the strict sense of the word during the lectures but rather "commented on" here. Study of these texts is therefore complementary to the lectures. The 15 hours of exercises scheduled for these studies, help with the assimilation and discussion of those texts. This time, therefore, does not constitute "review" but rather hours of group work. A personal succinct report is required and part of the final marks is especially reserved for the evaluation of these complementary readings.

3. English course (4 credits)

ANGL2430	English: Interactive communication[30h] (4 credits)1q	Claudine Grommersch, Philippe Neyt		
4. Workshops (8 credits)				
ECON2198	Workshop 1[30h] (4 credits)1q (in French)	Bernard Hanin, Francis Martin, Daniel		
		Weiserbs		
ECON2199	Workshop II[30h] (4 credits)2g (in French)	N.		

Workshop II[30h] (4 credits)2q (in French) ECON2199

These workshops confront the students with specific questions or topics, with the aim of helping them to read, summarise, analyse, present and write. These workshops therefore constitute the preparation for the thesis.

Those students who wish to anticipate lightening their second year programme have the possibility of *adding* one of the two reflexive courses offered in the second year to their first year programme.

ECON 22 Second year of studies

The second year comprises :

- two compulsory courses,
- one "historical" orientated course
- one "reflective" orientated course
- four options,
- a seminar,

- a thesis.

Some of the courses may be given in English.

During the course of the first fortnight following the start to the academic year, the student will choose a tutor from the list established by the department, together with whom he will prepare his programme. He must also have his thesis subject approved at the beginning of the first quadrimester.

1. Compulsory courses (12 credits)

ECON2207 Labour economics[30h+15h] (6 credits)1q (in French) Bart Cockx, Bruno Van der Linden ECON2208 International Trade[30h+15h] (6 credits)2q (in French) Philippe Monfort These sessions each comprise 30 hours of lectures, as well as 15 hours of exercises, aimed at covering the supervised readings (cfr 1st year).

2. Historical and reflective courses (8 credits)

The student will choose a "historical" oriented course from among the following subjects : ECON2251 History of Economic Theories[30h] (4 credits)2q (in French) Michel De Vroey or ECON2252 History of Economic and Social Development[30h] (4 **Isabelle** Cassiers credits)2q (in French)

The student will choose a "reflective" oriented course from among the following subjects :

ECON2251 credits/24 (in French) Christian Amsperger credits/24 (in French) 07 Economic and Social Ethies/30h1 (4 credits)1q (in French) Philippe Van Parijs 3. Options (16 credits) The student will chause four courses (acoth course is worth 4 ECTS) from the following list and from the list of the historical and reflective courses which applicies/30h1 (4 credits)2q (in French) Bernard Delbecque ECON2231 Economics of clucation/30h1 (4 credits)2q (in French) Vincent Vandenberghe Elisabeth Vin An Hecke ECON22324 Cronwins and economic structures in Belgium(30h) (4 credits)2q (in French) Vincent Vandenberghe Elisabeth Vin An Hecke ECON2235 Non-commercial economics(30h) (4 credits)1q (in French) Marice Christiane Closon Marice Christiane Closon ECON2235 ECON2235 ECON2236 Economics of health/30h1 (4 credits)1q (in French) Parter Giot Marice Christiane Closon ECON2236 ECON2237 ECON2237 ECON2237 ECON2238 Economics(30h1 (4 credits)1q (in French) Parter Giot Parter Giot ECON2236 ECON2246 Economy of the public sectol[30h1 (4 credits)1q (in French) Parter Giot Parter Giot ECON2237 ECON2237 ECON2247 Econometrics[30h1-15h1 (4 credits)2q (in French) Parter Giot Parter Giot ECON2247 ECON2247 Econometrics[30h1-15h1 (4 credits)2q (in French) French Parter Giot ECON2247 ECON2247 Econometrics[30h1-15h1 (4 credits)2q (in French

6. Thesis (18 Credits)

Evaluation

The courses generally conclude in oral exam sessions and the final mark takes into account the quality of any projects accomplished by the students. The thesis will be presented orally and defended before a jury.

Positioning of the degree within the University cursus

This "licence" degree entitles access to the various specialised programmes in Economics and Management (DES) or to prepare for research in Economics (DEA).
